**The Syntax-Information Structure Interface** Eugenia Casielles-Suárez, 2004-08-01 In the last decade the notions of topic and focus have come to play an increasingly relevant role in theoretical linguistics Although these notions are often taken for granted they are still poorly understood This study offers a detailed analysis of the precise definitions of these and related terms theme topic background given information focus contrast etc as well as of their combination into information structures such as the topic focus and background focus articulations It recommends pursuing a feature based typology of topics and argues against a dual nature of focus i e presentational vs contrastive Central questions addressed are the analysis of subjects in Spanish and English DP vs NP and null vs preverbal vs postverbal and the nature of constructions such as topicalization left dislocation and focus preposing Further it is proposed that in Spanish information structure can be read off the syntax while an overt DP in the preverbal specifier subject position is interpreted as the topic in a topic focus articulation one or more left or right dislocated phrases are interpreted as part of the background in background focus focus background structures

**Representational Deficits in SLA** Neal Snape, Yan-kit Ingrid Leung, Michael Sharwood Smith, 2009 The main focus of this collection is to explore the question of representational deficits in second language acquisition currently a much debated topic The volume is intended as a tribute to Roger Hawkins a leading scholar in generative second language acquisition whose research has been devoted to explaining lack of native like success in terms of representational deficits The papers in this volume feature a range of studies all undertaken within a generative linguistic framework which investigate various properties of L2 grammar bearing on the question of whether or not there are representational deficits in the post critical period L2 learners grammar The significance of such deficits if their existence can be confirmed is that they provide support for the claim at least for the type of L2 learner under investigation that there are insurmountable obstacles to ultimate attainment

**Linguistic Interfaces in East-Asian Languages** Jen Ting, Yu-Yin Hsu, 2024-08-08 This book contains new research essays of linguistic interface studies in or related to East Asian languages Written by 14 colleagues or former students of Yoshihisa Kitagawa it is also a book paying tribute to his decades of scholarships on linguistic interface studies The chapters therein range from interface studies in syntax and other linguistic areas such as morphology phonology semantics pragmatics language acquisition language evolution and language faculty science The languages under discussion are mainly East Asian languages such as Chinese Japanese and Korean but also include Jordanian Arabic and Spanish under comparative studies with respect to East Asian languages The book appeals to both seasoned and novice researchers in linguistics East Asian languages and modern languages Chapters Impersonal Bei Sentences in Early Mandarin Form and Function Focus Inside Evidence from Spanish and Chinese and Recursive Focus Prosody are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)

**The Routledge Handbook of Second Language Acquisition, Morphosyntax, and Semantics** Tania Ionin, Silvina

Montrul, Roumyana Slabakova, 2024-03-11 This handbook provides innovative and comprehensive coverage of research on the second language acquisition SLA of morphosyntax semantics and the interface between the two Organized by grammatical topic the chapters are written by experts from formal and functional perspectives in the SLA of morphosyntax and semantics providing in depth yet accessible coverage of these areas All chapters highlight the theoretical underpinnings of much work in SLA and their links to theoretical syntax and semantics making comparisons to other populations including child language acquirers bilinguals and heritage speakers links to first language acquisition and bilingualism dedicating a portion of each chapter to the research methods used to investigate the linguistic phenomenon in question links to psycholinguistics and experimental linguistics and where relevant including intervention studies on the phenomenon in question links to applied linguistics The volume will be indispensable to SLA researchers and students who work on any aspect of the SLA of morphosyntax or semantics With its coverage of a variety of methodologies and comparisons to other populations such as child language acquirers early bilinguals heritage speakers and monolingual adults the handbook is expected to also be of much interest to linguists who work in psycholinguistics first language acquisition and bilingualism

**Manual of Grammatical Interfaces in Romance** Susann Fischer, Christoph Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages

**The Syntax of Nonsententials** Ljiljana Progovac, 2006-01-01 This volume brings the data that many in formal linguistics have dismissed as peripheral straight into the core of syntactic theory By bringing together experts from syntax semantics pragmatics philosophy of language language acquisition aphasia and pidgin and creole studies the volume makes a multidisciplinary case for the existence of nonsententials which are analyzed in various chapters as root phrases and small clauses Me Me First Him worry Class in session and whose distinguishing property is the absence of Tense and with it any syntactic phenomena that rely on Tense including structural Nominative Case Arguably the lack of Tense specification is also responsible for the dearth of indicative interpretations among nonsententials as well as for their heavy reliance on pragmatic context So pervasive is nonsentential speech across all groups including normal adult speech that a case can be made that continuity of grammar lies in nonsentential rather than sentential speech

**The Syntax of Multiple-que Sentences in Spanish** Julio Villa-García, 2015-03-20 Complementizers offer a window into the architecture of the left periphery and further our understanding of the demarcation of the boundaries between the C complementizer and Tense domains Using the articulated left periphery as a laboratory and Spanish constructions featuring more than one complementizer as a point of departure the author delivers new insights into the syntactic positions and behavior of Spanish complementizer que along the left edge

These observations have far reaching consequences to such fundamental linguistic concepts as the derivation of left dislocations ellipsis and locality of movement Of great interest to syntax graduate students and researchers in general this volume provides a stepping stone to cracking the code on several current syntactic questions including the widely contested position of preverbal subjects in null subject languages like Spanish In addition it offers the linguist a bountiful toolbox for the cross linguistic investigation of a number of left peripheral and clausal phenomena

**Understanding Interfaces**  
 Laura Domínguez,2013-06-27 By combining theoretical analysis and empirical investigation this monograph investigates the status of interfaces in Minimalist linguistic theory second language acquisition and native language attrition Two major questions are currently under debate 1 what exactly makes a linguistic phenomenon an interface phenomenon and 2 what is the specific role that the interfaces play in explaining language loss and persistent problems in second language acquisition Answers to these questions are provided by a theoretical examination of the role that economy and computational efficiency play in recent Minimalist models of the language faculty as well as by evidence obtained in two empirical studies examining the acquisition and attrition of two interface phenomena Spanish subject realization and word order variation The result is a new definition of interface phenomena which deemphasizes syntactic complexity and focuses on the effect of interface interpretive conditions on syntactic structure This work also shows that representational deficits cannot be ruled out in the acquisition and attrition of interface structures
