Computer Network Architectures and Protocols Carl A. Sunshine,2013-06-29 This is a book about the bricks and mortar from which are built those edifices that will permeate the emerging information society of the future computer networks For many years such computer networks have played an indirect role in our daily lives as the hidden servants of banks airlines and stores Now they are becoming more visible as they enter our offices and homes and directly become part of our work entertainment and daily living The study of how computer networks function is a combined study of communication theory and computer science two disciplines appearing to have very little in common The modern communication scientist wishing to work in this area soon finds that solving the traditional problems of transmission modulation noise immunity and error bounds in getting the signal from one point to another is just the beginning of the challenge The communication must be in the right form to be routed properly to be handled without congestion and to be understood at various points in the network As for the computer scientist he finds that his discipline has also changed The fraction of computers that belong to networks is increasing all the time And for a typical single computer the fraction of its execution load storage occupancy and system management problems that are involved with being part of a network is also growing *IBM Systems Network Architecture* Gerardus Blokdyk,2018-04-24 How do we manage IBM Systems Network Architecture Knowledge Management KM A compounding model resolution with available relevant data can often provide insight towards a solution methodology which IBM Systems Network Architecture models tools and techniques are necessary Will IBM Systems Network Architecture deliverables need to be tested and if so by whom Are improvement team members fully trained on IBM Systems Network Architecture Who are the people involved in developing and implementing IBM Systems Network Architecture Defining designing creating and implementing a process to solve a challenge or meet an objective is the most valuable role In EVERY group company organization and department Unless you are talking a one time single use project there should be a process
