Tutorial on Office Automation Support and Information Systems Mark D. Storms, 1990 **Office Automation**, 1987-12  
Design of Office Information Systems Clarence A. Ellis, Najah Naffah, 2012-12-06 The goal of this book is to present a  
framework within which the myriad of office technologies and office systems design techniques can be better understood  
There are a number of office books which deal with the social organizational aspects of office automation or with office equip  
ment introduction strategies This book differs from those in that it is written by technical computer people for technical  
computer people As such it assumes a general computer literacy and contains a technical emphasis with a social fiber woven  
in Besides the framework we also present the current state of office primitives office tools and office technology We cover  
relevant work on going by international standards bodies and we discuss the concepts that are emerging or which we feel  
will be emerging from universities and industrial research laboratories Office technologies and techniques are classified as  
personal environment aids versus communal environment aids We now fully realize how difficult it is to write a coherent  
book within this fuzzy interdisciplinary rapidly changing field Concepts have been stressed wherever possible there are some  
sub areas where the generalizing concepts have not yet emerged We also realize the potential danger of obsolescence We  
have tried to combat this somewhat by the presentation of concepts generic tool design and emphasizing our framework  
This book is not a substitute for reading of the current periodical literature that is where the most timely information lies
