Rhetoric and Reality on the U.S.—Mexico Border K. Jill Fleuriet,2021-04-03 Stemming from four years of ethnographic research media analysis of over 750 national news articles published in the 2010s and decades of the author s professional and personal immersion in the Rio Grande Valley of south Texas Rhetoric and Reality illuminates a place at the heart of our national conversation the U S Mexico border K Jill Fleuriet contrasts the rhetoric of national political and media discourse with that of local border leaders in economics health care politics education law enforcement philanthropy and activism As she deconstructs the common narrative of a border in need of external intervention to control corruption poverty sickness and violence Fleuriet engagingly illustrates the range of regional organizing local development strategies and community responses in the borderlands that ultimately situate the Rio Grande Valley as the true North of the U S national compass where the Valley goes the rest of the country soon will follow Rhetoric and Reality asks us to question our own assumptions especially about those areas that drive national decisions about resource allocation economic development and national security Rhetoric and Reality is an important ethnographic study of the deeply misunderstood increasingly vilified Rio Grande Valley located on the Texas Mexico border Fleuriet presents a balanced counter narrative that that shows the region as one of growth innovation complexity and rich with meaning Rhetoric and Reality is an excellent example of place based reflexive scholarship appropriate for use in courses on border theory applied anthropology and research methods Written clearly and crisply with a wide readership in mind Rhetoric and Reality is mandatory reading for those wanting to better understand the US Mexico border region and the people who live there Margaret A Graham Professor and Chair The University of Texas Rio Grande Valley USA This is an important book as it describes life in the Rio Grande Valley rather than on the border The notion of the border as an open range in need of external help is challenged as the author illustrates the wide range of leadership and programmatic change occurring in the Rio Grande Valley Roberto R Alvarez Professor Emeritus of Ethnic Studies University of California San Diego USA

The Tapestry of Reality, Threads of Consciousness M.G. Hawking,Jenna Wolfe, Ph.D.,2026-01-15 We perceive conceptualize and interact with what we call reality through our consciousness and consciousness is the mystery of mysteries Consciousness is the thing most directly known to us and in the assessment of scholars from philosophers to physicists it is the only thing directly known to us Scientific research has provided remarkable new windows into concepts of reality revealing it to be a vast tapestry composed of an infinite number

of threads of consciousness All matter originates and exists only by virtue of the existence of consciousness The mind is the matrix of all matter Max Planck originator of Quantum Mechanics Nobel Laureate The world is a construct of our mind s sensations perceptions beliefs memories It is convenient to regard it as existing objectively on its own But it certainly does not Erwin Schrödinger Nobel Laureate The idea of an objective real world whose parts exist objectively in the same sense as stones or trees exist independently of whether or not we observe them is impossible Werner Heisenberg Nobel Laureate This book contains an exploration of consciousness and its most advanced abilities through accounts of explorer M G Hawking s experiences in an ancient village deep in the vast frozen fortress of the Himalayas Explore first hand narratives of demonstrations of psychokinetic and extrasensory abilities and in depth descriptions of the esoteric knowledge that enabled the attainment of such exceptional powers Advanced abilities of consciousness enable a person to influence a physical system without direct physical interaction a capacity increasing recognized in the academic and scientific communities as part of the field of human ability Although widely acknowledged in India Nepal Tibet and various Himalayan areas of Asia paranormal abilities have in the Western World been largely disregarded by the general population However in the scientific community the perception is very different Atoms or elementary particles themselves are not real they form a world of potentialities or possibilities rather than one of things or facts Werner Heisenberg Nobel Laureate Consciousness cannot be accounted for in physical terms for consciousness is absolutely fundamental It cannot be accounted for in terms of anything else Quantum physics reveals a basic oneness of the universe Multiplicity is only apparent in truth there is only one mind Erwin Schrödinger Nobel Laureate Reality is merely an illusion albeit a very persistent one Albert Einstein Nobel Laureate As entertaining as it is enlightening this is an incomparable book for anyone seeking enlarged knowledge and personal power 2026 Release Nine Book Exploratory Anthology e reader page count 265 estimated actual count varies depending on the reading device used For more information please see the preview feature on the bookseller s website Thank you
