Fundamentals of Creative Thinking John S. Dacey, 1989 **Creative Thinking** John F. Wakefield, 1992 This book presents the results of a series of studies of the relationships between thinking skills and the artistic personality The relationships are explored in fifth grade eighth grade 12th grade and college through research with groups and individuals Logic insight divergent thinking and creative thinking are routinely assessed in relation to indications of artistic interest or talent Although each study is separate in its methods results converge on a portrait of the developing artist as an individual who finds problems and solves them in his or her own way The functional definition of creative thinking guides the research and is validated by the results at all grade levels The book also furnishes a conception of creative thinking as extremely difficult This statistical conception is proposed as an explanation for why nonconformity is a common theme in stories by

creative individuals they are distant from the mode using the distance to achieve self definition Educational implications focus on cognitive skills training within the context of the arts and a balance between conventional and exceptional educational experiences to build bridges between arts students and the wider community

Creativity and Divergent Thinking John Baer,2014-01-09 Do general purpose creative thinking skills skills like divergent thinking which is touted as an important component of creative thinking no matter what the task domain actually make much of a contribution to creative performance Although much recent research argues against such domain transcending skills including several new studies reported in this book the appeal of such general skills remains strong probably because of the theoretical economy and power such skills would provide Divergent thinking in particular has had an incredible staying power Despite its many flaws divergent thinking remains the most frequently used indicator of creativity in both creativity research and educational practice and divergent thinking theory has a strong hold on everyday conceptions of what it means to be creative Reviewing the available research on divergent thinking this book presents a framework for understanding other major theories of creativity including Mednick s associative theory and a possible connectionist approach of creativity It reports a series of studies including the study that won APA s 1992 Berlyne Prize that demonstrate the absence of effects of general creative thinking skills across a range of creativity relevant tasks but indicate that training in divergent thinking does in fact improve creative performance across diverse task domains The book then ties these findings together with a multi level theory in which a task specific approach to creativity is strengthened by recasting some divergent thinking concepts into domain and task specific forms This book fills the gap between divergent thinking theory and more recent modular conceptions of creativity Rather than advocate that we simply discard divergent thinking an approach that hasn t worked or at least hasn t happened because of many attacks on its validity and usefulness this book shows how to separate what is useful in divergent thinking theory and practice from what is not It shows that divergent thinking training can be valuable although often not for the reasons trainers think it works And it offers specific suggestions about the kinds of creativity research most needed today

Creative Thinking J. G. Bennett, 2017-09-12 In this volume we have found it expedient to combine two texts previously published separately These two earlier publications have several common factors as both are made up of transcripts of series of six talks given at Coombe Springs in 1964 and 1965 to audiences drawn from the same invited participant pool and both presenting practical approaches to work At the time of these meetings a permanent group of about 50 men women and children lived at Coombe Springs a number of families lived close by and attended regularly and still more lived further away and traveled to Coombe Springs for weekly meetings or monthly work weekends The Creative Thinking course consisted of six weekly sessions mostly with students in close contact with Bennett while the How We Do Things course was arranged over a series of weekends and is more general in content Creative Thinking is based on the premise that an act of creation brings into existence something that had not previously existed By extension creative thinking is an action which spontaneously brings into existence a thought that has never previously existed Bennett used the six sessions to demonstrate to his students the techniques he used to attain to the revolutionary notions such as those contained in his *The Dramatic Universe* of which at that time only the first two volumes were in print *How We Do Things* is a practical exposition of the teaching Bennett presented publicly for the first time 17 years earlier in his first book *The Crisis in Human Affairs* which is to say that an action can only be called such if it is intentionally formulated and carried out All other behaviour is described as reaction or a response to external or even internal stimuli In order to act intentionally we require a heightened self awareness and command and control over our body minds and emotion beyond what is generally accepted as normal This is a non denominational book which does not draw upon any specialized resources beyond common sense
