Employment Policies and Multilevel Governance Roger Blanpain, Brian Langille, 2009-04-29 In Europe work has long been a symbol of full citizenship and today work is a fundamental goal of European social policy However although every person has the right to work it is becoming clearer all the time that unemployment is not due merely to a lack of encouragement to exercise this right but at least in part to some deeper defects in the implementation of effective employment policies As a contribution to defining the nature of these problems this important collection of essays targets the phenomena of multilevel governance both vertical European national regional local and horizontal administrative institutions trade unions business representatives NGOs showing with detailed analysis and data how coordination or conflict between the various levels advances or fails to advance the goals of employment policy Regarding the EU five EU Member States are examined plus for comparative analysis the parallel Canadian federal model with the authors addressing such concrete issues as the impact of globalisation and Europeanisation on employment policies distribution of tasks in the Open Method of Coordination OMC involvement of private and economic agents the increasing significance of international political agents flexicurity as an employment strategy the difficulty of integrating the excluded coordination with education and fiscal policies social inclusion from the point of view of international human rights and gender mainstreaming as a weakening of the EU guarantee of gender equality The essays originated in a research meeting held at the Instituto Internacional de Sociologia Juridica at Oati Spain in June of 2007 Some of the contributors all employment law experts discuss problematic aspects of the European Employment Strategy EES and its influence on the decentralization of employment policies and related elements of social protection Other authors concentrate on built in multilevel problems resulting from existing constitutional and administrative structures while a third group focuses on substantive approaches to employment policies within individual member states The Bulletin contains updated versions of all papers In this book the degree of administrative legal political and cultural intricacy involved in a serious engagement with multilevel governance of employment on the European model is put on full view As a deeply informed analysis of how the idea of multilevel governance has played out within the political and administrative reality of Member States the book will prove of enormous value to labour and employment law professionals anywhere as the problems identified here have a global reach **Re-Reading Education Policies** , 2009-01-01 This book

collects studies with a critical education policy orientation and presents itself as a handbook of matters of public concern. The term critical does not refer to the adoption of a particular theoretical framework or methodology but rather it refers to a very specific ethos or way of relating to the present and the belief that the future should not be the repetition of the past. This implies a concern about what is happening in our societies today and what could or should be happening in the future. As a consequence, the contributors to the book rely on a general notion of public policy that takes on board processes, practices and discourses at a variety of levels in diverse governmental and non-governmental contexts and considers the relation of policy to power, to politics and to social regulation. Following the detailed introduction that aims at picturing the landscape of studies with a critical education policy orientation, the book presents readings of six policy challenges: globalization, knowledge society, lifelong learning, equality, democracy, social inclusion, accountability, control, efficiency and teacher professionalism. It seeks to contextualise these in relation to issues of current global concern at the start of the 21st century. Despite the diversity of approaches, this collection of critical education policy studies shares a concern with what could be called the public and its education and represents a snapshot of education policy research at a particular time.

International Encyclopedia of Social Policy Tony Fitzpatrick, Huck-ju Kwon, Nick Manning, James Midgley, Gillian Pascall, 2013-07-04. Available in paperback for the first time. This milestone work offers an in-depth treatment of all aspects of the discipline and practice of social policy globally. Supported by a distinguished international advisory board, the editors have compiled almost 900,000 words across 734 entries written by 284 leading specialists to provide authoritative coverage of concepts, policy actors, welfare institutions and services along a series of national, regional and transnational dimensions. Also included are biographical entries on major policy makers and shapers. The editors have particularly striven to provide strong coverage of differing geographical and cultural traditions so that the variety of social policy as both an academic discipline and a domain of governance is reflected. Contributors draw in and make the necessary connections with social policy's associated disciplines to provide a rich picture of this vast and highly diverse field. Comprehensive and authoritative, the Encyclopedia has sought to open up rather than to foreclose the numerous areas in which there is on-going research, debate and sometimes serious disagreement and divergence in theory and practice. To this end, entries attempt to introduce a core or common ground of understanding before moving on to a wider discussion of debates regarding different conceptual and geographical approaches. The whole is integrated by cross-referencing and each entry includes a bibliography for further reading. There is a full index. The
