Street Child:

Street Children and Homeless Youth Lewis Apte, Daniel Stoecklin, 2013-11-18 This book deals with street children who live in the developing world and homeless youth who are from the developed world They are referred to as children in street situations CSS to show that the problem is both in the children and in the situation they face The book examines several aspects of the children and their street situations including the families of origin and the homes they leave the children's social life and mental health Other aspects are the problems of published demographics the construction of public opinion about these children and the often violent reactions from authorities The book then discusses current research on children in street situations as well as programs and policies The book ends with recommendations about programs policies and research

Street Children in Kenya Philip L. Kilbride, Collette A. Suda, Enos Njeru, 2000-03-30 As kinship relationships and support networks across family lines weaken with modernization economic stressors take a great toll on children Kenya like some other nations in Africa and around the globe has witnessed a rapid rise in street children The street children in Nairobi come from single parent families which are mostly headed by women Another group are AIDS orphans This study documents how street children in Nairobi follow survival strategies including for boys collecting garbage and for girls prostitution Gender is emphasized throughout the book Although impoverished families are the most likely to produce street children not all poor families have their children on the streets The problem of street children is a complex one that calls for a comprehensive and coordinated policy and program for intervention at all levels and in all sectors of society Alleviating poverty and rebuilding the family institution should be among the first steps in addressing the problem

Street Children Gabriel Julien, 2022-06-30 Street children Who are they Why do they live on the streets Do they deliberately choose to be homeless What quality of life do they enjoy What are the characteristics of these children These questions appear to be simple but the answers are extremely complex In general street children are those who are deprived of their basic rights and

dignity as human beings They do not have proper education and are extremely vulnerable to all types of exploitation Street children have complex circumstances and are very vulnerable to exploitation and violence They lack vital services such as education and healthcare because they are marginalized hence they are deprived of their right to education because they work to support themselves or their families so a lot of red tape and bureaucracy will be needed to try to get them into school Very often the public are uninformed about these children and they instinctively judge and cast aspersions on them This book presents a clear understanding about some of the issues that street children encounter daily With the use of existing literature it tries to provide a definition and quantify the number of street children globally It explains the difference between children on and of the streets and highlights some of the notions of street culture and child abuse It is the firm view that if the public are more cognizant of the reasons why these children live on the streets they may be more compassionate This book does not evoke sensationalism but tries as far as possible to create an awareness of the lifestyle of street children
