given them and that the latter might be kept in the style I had been accustomed to use in my lectures I have complied with their desire not because there is a dearth of ophthalmological textbooks but that I might afford these grateful and diligent students of mine the possibility of taking a personal souvenir with them in their later life work The form I have chosen seems suited for this purpose in spite of manifest faults When one or another of them in the future may look over the clinical cases here recorded when in his mental vision he views the life in the clinic when the personality of his teacher is with him again many a recollection from bygone days will be quickened for the most delightful period in the life Of a physician is the time when still young and with perfect ideal he visits the clinics and treats his first patients without responsibility Didactically also the form of the clinical lecture seems to me to be proper for a textbook of Ophthalmology even though the details of clinical histories must be omitted because of limited space With changes in the small organ so easily overlooked it is important that those who wish to learn or to freshen and enlarge their knowledge should always in each type of disease refer systematically to all that may be considered in such cases The form employed certainly involves the danger of a certain monotony for the reader but it is hoped that this will be somewhat ameliorated by the direct living intercourse between him and the book At any rate it is always easier to remember the things to be observed in one's own practice from the individual description of certain cases than from a summary discussion of a certain subject Hence I hope that not only the student but the physician as well will look with a kindly eye upon the pedagogy in this book For it may say of itself that it is born of a glowing love of science and is animated only by the wish to be of service to the physician and the patient to the learner and the sufferer About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
