The Favourite:

The Favourite Scratched; Or, The Spider and the Fly ... Bracebridge Hemyng, 1869 *The Anglo-Dutch Favourite* David Onnekink, 2016-03-16 Hans Willem Bentinck 1st Earl of Portland 1649-1709 was the closest confidant of William III and arguably the most important politician in Williamite Britain Beginning his career in 1664 as page to William of Orange his fortunes gained momentum with the Prince's rise to power in The Netherlands and Britain emerging as William's favourite at court from the 1670s onwards Taking a broadly chronological approach the central concern of this book is not simply to provide a biographical account of Portland's life but to explore wider political themes within a European context By analysing Portland's role within William's government it shows how royal favourites could still wield considerable influence on European events and help shape royal policy particularly with regard to foreign policy By engaging with the question of why such a figure emerged this study helps illuminate the workings of William's government and the central role of his foreign entourage Drawing from archival material in England Scotland France and The Netherlands it ties the history of post Revolution Britain with political events in the Netherlands It also analyses Anglo-Dutch political relations during the crucial period of the Nine Years War Britain's first major commitment to a continental war since the sixteenth century In so doing it connects Dutch and British historiography and significantly contributes to our understanding of British politics during the 1690s both domestically and within an international context **The Economics of Gambling** Leighton

Vaughan-Williams, 2005-09-27 Against a background of extraordinary growth in the popularity of betting and gaming across many countries of the world there has never been a greater need for a study into gambling's most important factor its economics This collection of original contributions drawn from such leading experts as David Peel Stephen Creigh Tyte Raymond Sauer and Donald Siegel covers such interesting themes as betting on the horses over under betting in football games national lotteries and lottery fatigue demand for gambling economic impact of casino gambling This timely and comprehensive book covers all the bases of the economics of gambling and is a valuable and important contribution to the ongoing and growing debates The Economics of Gambling will be of use to academics and students of applied industrial and mathematical economics as well as of being vital reading for those involved and interested in the gambling industry *The War of the Nations* William Le Queux, 1917 *The Badminton Magazine of Sports and Pastimes* Alfred Edward Thomas

common law are no longer the focus The lessons of the first generation have been absorbed and transcended The focus has shifted to the level of application which is the level at which the economist and the lawyer economist can best hope to influence policy We are making progress and the essays in this volume will do much to assure that progress continues From the foreword by Richard A Posner United States Court of Appeals for the Seventh Circuit and University of Chicago Law School US One of the most exciting and productive areas of research in environmental policy is resulting from the integration of the traditionally separate fields of environmental economics and law and economics This book brings together the top researchers engaged in this enterprise to share the useful insights that are emerging Both in terms of the scope of coverage and the depth of analysis this is an absolutely first rate book Tom Tietenberg Colby College Maine US This outstanding book focuses on how economics can contribute to the design implementation and appraisal of legal systems that create the right incentives for environmental protection The sixteen original and specially commissioned contributions written by some of the leading names in their field span many of the important areas of contemporary interest and employ case study material combined with theoretical empirical and experimental research The book addresses many topical issues including the fundamental notions of property rights and social norms the design and implementation of civil liability regimes the use of criminal law as an instrument of environmental policy the role that citizen suits self monitoring and self enforcement could and should play in the implementation of law the international harmonisation of environmental law and the treatment of environmental damages in courts Cutting edge economic technique is motivated by and articulates with real and pressing policy debates The contributors refer to a range of legal cases and policy decisions and draw out a host of policy implications and prescriptions for settings as diverse as Superfund reform in the US and the harmonisation of landfill regulations in the European Union By combining incisive overviews of the latest thinking and results complemented by original analysis The Law and Economics of the Environment will appeal to researchers and students of the environment law and economics policy practitioners and those with an interest in knowing what constitutes good environmental law
