**A Beginner's Guide to the MMPI-A** Carolyn L. Williams, James Neal Butcher, 2011 The MMPI A is the most widely used personality inventory for adolescents and there are no two people who know it better than Carolyn L. Williams and James N. Butcher. A Beginner's Guide to the MMPI A provides an introduction to an assessment standard that is solidly grounded in adolescent psychology. It can be used as a text in graduate classes as a how-to for psychologists interpreting the MMPI A or as a reference book. It is written for a diverse audience to include physicians, social workers, counselors, and attorneys along with psychologists. Williams and Butcher explain in jargon-free language how the MMPI A was developed and how it can be interpreted using the multiple scales added over its almost 70-year history. The book walks the reader through the steps of test administration, scoring, interpretation, and how to integrate the MMPI A into a psychological evaluation. The authors also demystify computerized interpretive systems for the MMPI A. Readers have the opportunity to quiz themselves on how scale scores take shape as interpretive statements and to interact with 15 case scenarios. Finally, the authors provide step-by-step guidance on the best practices for sharing their interpretive reports with adolescents and parents in MMPI A feedback sessions.

*Oxford Handbook of Personality Assessment* James N. Butcher, 2009-07-14 Oxford Handbooks offer authoritative and up-to-date reviews of original research in a particular subject area. Specially commissioned chapters from leading figures in the discipline give critical examinations of the progress and direction of debates as well as a foundation for future research. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities, social sciences, and sciences. As one of psychology's oldest fields, personality assessment is one of the most extensively studied subsets of contemporary psychology. The Oxford Handbook of Personality Assessment synthesizes new and existing literature with clinical practice to provide a comprehensive volume on contemporary personality assessment, including its historical developments, underlying methods, applications, contemporary issues, and assessment techniques. This handbook, part of the Oxford Library of Psychology, addresses both the historical roots of personality assessment and the evolution of its contemporary methodological tenets, thus providing a foundation for the handbook's other innovative focus: the application of personality assessment in clinical, personnel, and forensic assessments. With a wealth of respected international contributors and unequalled breadth of content, the Oxford Handbook of Personality Assessment offers an authoritative and field-encompassing resource for researchers and clinicians from across the medical, health, and psychology disciplines, i.e., clinical psychology, psychiatry, and social work, and would be an ideal text for any graduate course on the topic of personality assessment.

**Assessing Police and Other Public Safety Personnel with the MMPI-3** YOSSEF S., COREY BEN-PORATH (DAVID M.), David M. Corey, 2024-10-08. A hands-on guide for using the MMPI-3 when assessing suitability and fitness for duty of public safety personnel. Factors unique to police and public safety candidate selection require adjustments to standard guidelines when interpreting MMPI-3 scores. David M. Corey and Yossef S. Ben Porath's latest work broadly focuses on use of the MMPI-3 in both prehire suitability evaluations and posthire fitness for duty evaluations of individuals in public safety occupations. This practical guide was written for clinicians who conduct evaluations of incumbent public safety personnel as well as candidates for law enforcement, correctional, firefighter, medic, or emergency dispatcher positions. The chapters are devoted to foundational and practical knowledge required for conducting these evaluations, including a concise primer on the MMPI-3, common procedural and legal requirements, and contextual factors affecting evaluations. The book also provides case illustrations that demonstrate use of integrative models in preemployment and fitness for duty evaluations and includes expanded coverage of the updated MMPI-3 Police Candidate Interpretive Report as well as the newly released Correctional Candidate Interpretive Report, Dispatcher Candidate Interpretive Report, and Firefighter Candidate Interpretive Report.

**Sexual Offending** Amy Phenix, Harry M. Hoberman, 2015-12-07. This expert reference provides a broad, comprehensive review of the major domains of sexual offending. Beginning with an integrated etiological model of sexual offending, chapters follow addressing the primary predisposing conditions related to sexual offending, e.g., pedophilic, hebephilic, paraphilic, rape, and non-contact paraphilic disorders, hypersexuality, and personality factors. In addition, special subgroups of sexual offenders, females, youth, and the intellectually disabled, are considered. Both broad and specific perspectives on the assessment of sexual offenders are provided. Overviews are offered of clinical and forensic evaluations of such offenders and the utility of structured psychological assessment. A novel conceptual model of risk assessment is proposed. More specifically, each of the primary approaches or instruments related to risk assessment of sexual offending are addressed: the Static Risk Assessment Measures, the Sex Offender Risk Appraisal Guide, structured professional judgment, and the varied measures of dynamic or criminogenic needs assessment. Finally, multiple aspects of management of sexual offenders are discussed, including models of psychosocial treatment, the question of the effectiveness of such treatment, biological interventions, civil commitment, circles of support, and the containment approach to community management. Chapters are authored by both prominent experts and experienced professionals for a breadth of perspective. Among the topics covered: Pedophilic, Hebephilic, Rape, Paraphilic Disorders, and the

variety of Non Contact sexual offending conditions Personality related conditions their association with sexual offending motivators and disinhibition in context Disorders of hyper sexuality Assessments of sexual offenders including the role of psychological testing clinical interview approaches as well as forensic evaluations Conceptual models of risk assessment discussion of specific static dynamic structured clinical risk assessment approaches Models of reviews of treatment outcome with sexual offenders including psychotherapy psychopharmacology and castration the containment approach civil commitment circles of support Overview of public policy issues an evidence based perspective on sex offender registration and residential restrictions This breadth of material in Sexual Offenders will help practitioners gain multiple levels of clinical insight as well as giving them up to date practical tools and techniques for working with this problematic class of individuals
