Wine For Today:

Islamic Mystical Poetry Mahmood Jamal, 2009-10-29 Written from the ninth to the twentieth century these poems represent the peak of Islamic Mystical writing from Rabia Basri to Mian Mohammad Baksh Reflecting both private devotional love and the attempt to attain union with God and become absorbed into the Divine many poems in this edition are imbued with the symbols and metaphors that develop many of the central ideas of Sufism the Lover the Beloved the Wine and the Tavern while others are more personal and echo the poet's battle to leave earthly love behind These translations capture the passion of the original poetry and are accompanied by an introduction on Sufism and the common themes apparent in the works This edition also includes suggested further reading

Kotatko, 2012-12-06 Quine is one of the twentieth century's most important and influential philosophers The essays in this collection are by some of the leading figures in their fields and they touch on the most recent turnings in Quine's work The book also features an essay by Quine himself and his replies to each of the papers Questions are raised concerning Quine's views on knowledge observation holism truth naturalized epistemology about language meaning the indeterminacy of translation conjecture and about the philosophy of logic ontology singular terms vagueness identity and intensional contexts Given Quine's preeminent position this book must be of interest to students of philosophy in general Quine aficionados and most particularly to those working in the areas of epistemology ontology philosophies of language of logic and of science

Addiction Jon Elster, 1999-10-28 Addiction focuses on the emergence nature and persistence of addictive behavior as well as the efforts of addicts to overcome their condition Do addicts act of their own free will or are they driven by forces beyond their control Do structured treatment programs offer more hope for recovery What causes relapses to occur Recent scholarship has focused attention on the voluntary aspects of addiction particularly the role played by choice Addiction draws upon this new research and the investigations of economists psychiatrists philosophers neuropharmacologists historians and sociologists to offer an important new approach to our understanding of addictive behavior The notion that addicts favor present rewards over future gains or penalties echoes throughout the chapters in Addiction The effect of cultural values and beliefs on addicts and on those who treat them is also explored particularly in chapters by Elster on alcoholism and by Acker on American heroin addicts in the 1920s and 1930s Essays by Gardner and by Waal and M rland discuss the neurobiological roots of addiction Among their findings are evidence that addictive drugs also have an important effect on areas of the central nervous system unrelated to euphoria or dysphoria and that tolerance and withdrawal phenomena vary greatly from drug to drug The plight of addicts struggling to regain control of their lives receives important consideration in Addiction Elster Skog and O Donoghue and Rabin look at self administered therapies ranging from behavioral modifications to cognitive techniques and discuss conditions under which various treatment strategies work Drug based forms of treatment are discussed by Gardner drawing on work that suggests that parts of the
