Another Kind of Justice Chris Madsen, 2011-11-01 Another Kind of Justice is the first historical survey of Canadian military law providing insights into military justice in Canada the purpose of military law and the level of legal professionalism within the Canadian military Drawing on a wide range of materials Chris Madsen traces the development of military law from 1867 to 1997 After delving into the British roots of Canadian military law he brings his discussion up to date with analysis of recent sexual discrimination cases and the Somalia inquiry He explains how the law has served a strictly functional purpose in maintaining

discipline and demonstrates how it claims its legitimacy and distinct status in relation to civil law It becomes clear that military law has responded to pragmatic needs in a reactive rather than a planned manner Another Kind of Justice describes the statutes and regulations that govern Canada's armed forces the institutions responsible for overseeing military law and how knowledge about military law is disseminated Madsen concludes that longstanding organizational problems and training deficiencies bear some of the responsibility for the unfortunate behaviour of Canadian soldiers in Somalia The Universities and British Industry Michael Sanderson,2018-10-11 Originally published in 1972 The University and British Industry examines the lively and controversial relationship between British industry and the university The book looks at the impact of industry on the development of British universities from the 1850s to the 1970s and with contribution from the universities to industry through scientific research and the supply of graduate skills The book argues that the close involvement of the universities and industry has been one of the chief beneficial forces shaping the British universities movement in the last hundred years It gives an account of the changes which took place within the universities to make them more suitable for industries purposes describing for example the early rise of the English civic universities strongly financed by and closely supporting industry The book also considers how during the two world wars industry became highly reliant on the universities for the war technology and how despite the depression between the wars university research and graduate employment embraced the widening opportunities of the new industries The book also discusses the expansion of the university in the sixties and points out that industrial motives have merged with those of social justice posing dilemmas for present and future relations between universities and industry **Political Handbook of the World 1991** Arthur S.
