Abbott, Brian Ferriso, Karen Smith, 2011-07-01 Washington State is about to enter a new phase of the math wars Since the late 1980s the debate over how best to teach mathematics to schoolchildren has raged worldwide among educators politicians and parents The stakes are high To operate effectively in a global twenty first century economy and polity the United States must provide an education in mathematics that is both excellent and equitable In this volume four scholars at the Washington School Research Center WSRC at Seattle Pacific University present original research drawn from statistical studies of state educational data and from thousands of classroom observations carried out by The BERG Group They assess the current state of math education and review its history and development The authors also provide a dispassionate review of the extensive international national and state literature The in depth observational research in Winning the Math Wars confirms that the

real issue is neither the approach to teaching traditional or reform nor the type of curriculum If America's goal of educational equity and excellence is to be achieved then math teachers everywhere must be fully supported in developing the specific skills that are ideal for educating all students The authors discussion focus on four principles for improving math teaching and learning fidelity to reform efforts by all involved an emphasis on instruction and instructional tools the critical nature of mathematical knowledge and the need for transformational change **Winning the Math Wars** is an important book for policy makers school leaders practitioners of mathematics education parents and anyone who wants to make sense of the math wars **Winning at Math Transition** Paul D. Ward,2023-08-23 As we sailed out of our cove our home behind us and the complete unknown ahead I couldn't help thinking that I was leaving everything I knew and loved with the exception of Michael and Ally Talk about being pushed past my comfort zone in just about every direction Kimberly is a traveler adventurer and gardener Not a sailor Yet she her husband and their 10 year old daughter moved aboard their 34 foot boat for two years and sailed from Massachusetts to Grenada and back Packed with detailed information this is the story of their decision to go the two years of planning to make it work plus the first several months they lived aboard More than a mere guidebook it is part memoir and part instruction manual for breaking free of the ordinary Travelers gardeners sailors and dreamers alike who seek to live an intentional life a bit off the beaten path will find both wisdom and inspiration in this family's adventures **The Pageant of America: The winning of freedom, by William Wood and R.H. Gabriel** Ralph Henry Gabriel,1927 **Productive Homeschooling** Jan Cespedes,Vicki Cespedes,Ivana Cespedes,2019-12-19 The Cespedes parents Jan and Vicki and all 5 of their daughters Ivana 23 Belicia 22 Briana 20 Giana 19 and Eliana 9 share memories of their homeschool journey and how they were able to accomplish amazing achievements while still so young They will each share thoughts about their philosophy of education daily routines the things they enjoyed most the things they would have done differently books and resources they used tips for acceleration etc The father Jan Cespedes who is suffering with terminal cancer wanted to write this as a legacy book and a tribute to his wife and daughters Vulnerability and transparency are seen throughout the story of parents who felt inept to take on such a daunting task as the home educating of their daughters and more importantly of the discipleship of their hearts **Math Horizons** ,1993 **The Risks of Knowing** Karen Zelan,2013-06-29 It gives me great pleasure to introduce this important and fascinating book on the internal dilemmas youngsters face in school which often cause them to stop learning We are all too ready to ascribe learning problems to an inability to learn and leave it at that This book should

go a long way toward convincing us that using such simpleminded explanations and remedial efforts based on them do not work Unlike other books that identify the causes of learning disabilities in children or that detail society's impact on the so-called helpless child *The Risks of Knowing* is an in-depth study of young people who for reasons of intrapsychic conflicts and of intellectual development make a negative decision about the learning process This book is unique in its thorough analysis of the conflicts young people have with learning and in its treatment prescriptions In case after case Karen Zelan demonstrates that if young people declare themselves unable to learn it is because for some valid reasons they believe learning is dangerous The reasons that cause a decision to fail often remain unconscious until they are brought to the child's awareness When the child is helped to understand the source of any inner dilemmas both child and parents are able to find better solutions to immediate learning difficulties Karen Zelan brings a rare expertise to the problems young people find in academic learning
