The K Section:

The Code of Federal Regulations of the United States of America, 2001 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government

Machine Learning Foundations, Volume 1 Roi Yehoshua, 2026-02-09 The Essential Guide to Machine Learning in the Age of AI Machine learning stands at the heart of today's most transformative technologies advancing scientific discovery reshaping industries and transforming everyday life From large language models to medical diagnosis and autonomous vehicles the demand for robust principled machine learning models has never been greater

Machine Learning Foundations Volume 1 Supervised Learning offers a comprehensive and accessible roadmap to the core algorithms and concepts behind modern AI systems Balancing mathematical rigor with hands on implementation this book not only teaches how machine learning works but why it works As part of a three volume series Volume 1 lays the foundation for mastering the full landscape of modern machine learning including deep learning large language models and cutting edge research Each chapter introduces core ideas with clear intuition supports them with rigorous mathematical derivations where appropriate and demonstrates how to implement the methods in Python while also addressing practical considerations such as data preparation and hyperparameter tuning Exercises at the end of each chapter both theoretical and programming based reinforce understanding and promote active learning The book includes hundreds of fully annotated code examples available on GitHub at github.com/roiyeho/ml-book along with six comprehensive online appendices covering essential background in linear algebra calculus probability statistics optimization and Python libraries such as NumPy Pandas and Matplotlib Master the key concepts of supervised machine learning including model capacity the bias variance tradeoff generalization and optimization techniques Implement the full supervised learning pipeline from data preprocessing and feature engineering to model selection training and evaluation Understand key learning tasks including classification regression multi label and multi output problems Implement foundational algorithms from scratch including linear and logistic regression decision trees gradient boosting and SVMs Gain hands on experience with industry standard tools such as Scikit Learn XGBoost and NLTK Refine and optimize your models using techniques such as hyperparameter tuning cross validation and calibration Work with diverse data types including tabular data text and images Address real world challenges such as imbalanced datasets missing data and high dimensional inputs Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details
