## **The Möbius Trip:**

**The Möbius Trip** William Garner, 1978     *The Möbius Trip* William Garner, 1978     **Technology, Innovation, Entrepreneurship and Education** Jeremy Foss, David Crawford, Waqas ur Rahman, 2025-10-09 This book constitutes the refereed proceedings of the 5th EAI International Conference on Technology Innovation Entrepreneurship and Education TIE 2025 held in Cambridge UK during March 17-18 2025. The 8 full papers included in this book were carefully reviewed and selected from 29 submissions. These papers provide a vision of technologies applied to enterprise, education, medicine, and cultural heritage, reflecting our collective ambition to explore pioneering ideas and redefine the future of learning, innovation, and societal progress.

**Zoomland** Florentina Armaselu, Andreas Fickers, 2023-12-31 Despite a variety of theoretical and practical undertakings, there is no coherent understanding of the concept of scale in digital history and humanities, and its potential is largely unexplored. A clearer picture of the whole spectrum is needed, from large to small, distant to close, global to local, general to specific, macro to micro, and the in-between levels. The book addresses these issues and sketches out the territory of Zoomland at scale. Four regions and sixteen chapters are conceptually and symbolically depicted through three perspectives: bird's-eye, overhead, and ground view. The variable scale representation allows for exploratory paths covering areas such as theoretical and applicative reflections on scale, combining a digital dimension with research in history, media studies, cultural heritage, literature, text analysis, and map modelling; creative use of scale in new digital forms of analysis; data organisation; interfaces; and argumentative or artistic expressions. Zoomland provides a systematic discussion on the epistemological dimensions, hermeneutic methods, empirical tools, and aesthetic logic pertaining to scale and its innovative possibilities residing in humanities-based approaches and digital technologies. Enter the Zoomland game [here](#) or watch the [teaser](#).

**The Tomorrow Code** Brian Falkner, 2009-07-28 The end of the world started quietly enough for Tane Williams and Rebecca Richards. Tane and Rebecca aren't sure what to make of it: a sequence of 1s and 0s. The message looks like nothing more than a random collection of alternating digits. Working to decode it, however, they discover that the message contains lottery numbers—lottery numbers that win the next random draw. More messages follow, and slowly it becomes clear: the messages are being sent from Tane and Rebecca's future. Something there has gone horribly wrong, and it's up to them to prevent it from happening. The very survival of the human race may be at stake. A terrifying SF page-turner. Booklist: A tautly constructed plot, fast-paced and all too realistic. This techno-thriller offers gearhead ecowarriors everything, including a hugely satisfying ending. Kirkus Reviews: A Top 10 Kid's Indie Next Winter Pick. A Junior Library Guild Selection.
