## **The Mound Builders:**

**The Mound Builders** Robert Silverberg, 1986-05-01 In Illinois the one hundred foot Cahokia Mound spreads impressively across sixteen acres and as many as ten thousand more mounds dot the Ohio River Valley alone *The Mound Builders* traces the speculation surrounding these monuments and the scientific excavations which uncovered the history and culture of the ancient Americans who built them The mounds were constructed for religious and secular purposes some time between 1000 B C and 1000 A D and they have prompted curiosity and speculation from very early times European settlers found them evidence of some ancient and glorious people Even as eminent an American as Thomas Jefferson joined the controversy though his conclusions that the mounds were actually cemeteries of ancient Indians remained unpopular for nearly a century Only in the late 19th century as Smithsonian Institution investigators developed careful methodologies and reliable records did the period of scientific investigation of the mounds and their builders begin Silverberg follows these excavations and then recounts the story they revealed of the origins development and demise of the mound builder culture

phrases for an effortless more informed read *Mound Builders and Monument Makers of the Northern Great Lakes, 1200-1600* Meghan C L Howey, 2012-11-20 Rising above the northern Michigan landscape prehistoric burial mounds and impressive circular earthen enclosures bear witness to the deep history of the region's ancient indigenous peoples. These mounds and earthworks have long been treated as isolated finds and have never been connected to the social dynamics of the time in which they were constructed, a period called Late Prehistory. In *Mound Builders and Monument Makers of the Northern Great Lakes 1200-1600* Meghan C L Howey uses archaeology to make this connection. She shows how indigenous communities of the northern Great Lakes used earthen structures as gathering places for ritual and social interaction which maintained connected egalitarian societies in the process. Examining every available ceramic sherd from every northern earthwork Howey combines regional archaeological investigations with ethnohistory analysis of spatial relationships and collaboration with tribal communities to explore changes in the area's social setting from 1200 to 1600. During this time cultural shifts such as the adoption of maize horticulture led to the creation of the earthen constructions. Burial mounds were erected marking claims to resources and defining areas for local ritual gatherings while massive circular enclosures were constructed as intersocietal ceremonial centers. Together Howey shows these structures made up part of an interconnected purposefully designed cultural landscape. When societies incorporated the earthworks into their egalitarian social and ritual behaviors the structures became something more ceremonial monuments. The first systematic examination of earthen constructions in what is today Michigan *Mound Builders and Monument Makers of the Northern Great Lakes 1200-1600* reveals complicated indigenous histories that played out in the area before European contact. Howey's richly illustrated investigation increases our understanding of the diverse cultures and dynamic histories of the pre-Columbian ancestors of today's Great Lake tribes.

*Native American Tribes* Charles River Charles River Editors, 2017-02-22 Includes pictures of mounds and other artifacts created by the Mound Builders. Explains the origins of the Mound Builders and how their culture influenced today's Native American tribes. Discusses the mysteries of the Mound Builders and theories about them. Includes a Bibliography for further reading. There being one of these mounds in my neighborhood I wished to satisfy myself whether any and which of these opinions regarding the identity of the Mound Builders were just. For this purpose I determined to open and examine it thoroughly. Thomas Jefferson. When Europeans first came upon the giant mounds and earthworks dotting the North American landscape in the 18th century they couldn't imagine that the Native Americans they came into contact with were capable of such advanced technology and masterful engineering. In fact when President George Washington sent adventurer and military strategist Rufus Putnam to survey the land at the convergence of the Ohio and Muskingum Rivers in southeastern Ohio for settlement Putnam reported that he'd discovered an impressive walled earthwork complex near present day Marietta that was obviously the breastwork of an ancient fortress built by some long forgotten ancient civilization. Like others of his time Putnam couldn't conceive that indigenous Americans had at one time reached such an

advanced level of cultural and technical sophistication As detailed by Thomas Jefferson in his 1783 book Notes on the State of Virginia about 1780 the future American President began to excavate a mound near Montecello his Virginia estate He noted I determined to open and examine it thoroughly It was situated on the low grounds of the Rivanna River about two miles above its principal fork and opposite to some hills on which had been an Indian town It was of a spheroidal form of about 40 feet diameter at the base Jefferson discovered stratified human remains and ultimately concluded that this particular mound was an ancient Indian burial place Credited with what was perhaps the first systematic archaeological excavation in North America Jefferson came to the realization that different mounds might serve different uses which has since been proven correct However even as these elaborate earthen complexes have ultimately yielded tens of thousands of artifacts including ear spoons panpipes effigy figurines engraved copper gorgets head plates and headdresses bone hair pins silver and copper tablets game stones greenstone axes flint blades and zoomorphic effigy vessels to list just a few they have really only added to the mystery and intrigue surrounding the Mound Builders as these ancient peoples are now known These standing testaments to early man s extraordinary accomplishments continue to speak of a period of time about which scholars can only theorize With no evidence of a written language and a high probability that associated groups spoke different languages based on the earliest lingual patterns encountered from each region what the so called Mound Builders accomplished in the span of a few centuries is nothing short of phenomenal Native American Tribes The History and Culture of the Mound Builders comprehensively covers the facts mysteries and theories surrounding the ancient Native Americans who built the elaborate mounds discussing what is known and unknown about their origins Along with pictures and a bibliography you will learn about the Mound Builders like you never have before in no time at all **Who Were the Mound Builders?** David Anthony,2013-08-01 Readers will follow Evan as he visits several American Indian mounds gaining an understanding of what they are why they were built and who built them Age appropriate language vivid imagery and a relatable narrative will grab students attention keeping them engaged while also equipping them with the skills they need to become thoughtful readers This book provides additional learning opportunities through a graphic organizer glossary and index **The Origin of the Mound Builders** Alfred Coffin,2024-01-03 **The Mississippian Culture: The Mound Builders** Louise Spilsbury,2018-07-15 The Mound Builders were some of the most advanced Native peoples to be encountered by European explorers They made their homes in the part of North America along what is now known as the Mississippi River Their complex ancient culture is very impressive the Mound Builders are credited with being the first group of people to rely on farming as a major source of food This book features photographs of cool artifacts and critical thinking questions to engage readers as they draw their own conclusions while learning about the Mound Builders **Mound-Builders** William J. Smyth,2019-12-09 In Mound Builders William J Smyth delves into the intricate world of prehistoric Native American societies known for their earthen mounds intricately weaving archaeological findings with an evocative narrative style Smyth adopts a

multidisciplinary approach blending anthropology geology and history to present a comprehensive examination of these enigmatic cultures The book meticulously traces the socio political structures rituals and environmental adaptations that defined the daily lives of the mound builders situated within the broader context of North American archaeology Smyth s adept use of rich descriptive language invites readers to visualize the landscapes and communities that flourished long before European contact offering a nuanced perspective on their legacies and contributions to heritage conservation discussions today William J Smyth a renowned scholar in archaeological studies draws on years of fieldwork and research in North America enriching his narrative with personal observations and critical analyses of existing literature His background in anthropology and a personal fascination with ancient cultures propel him to advocate for a deeper understanding of the indigenous civilizations that once thrived in North America Smyth s insights are informed by historical scholarship and a desire to challenge contemporary misconceptions about these societies Mound Builders is an essential read for anyone interested in American history archaeology and indigenous studies Smyth s compelling storytelling not only informs but also inspires a connection to the past urging readers to appreciate the profound impact that these ancient communities have on today s cultural landscapes This book is a crucial addition to the canon of literature exploring America s indigenous heritage making it highly recommended for scholars and general readers alike
