**Mass Terms and Plurals** Per F. V. Hasle, University of Cambridge. Computer Laboratory, 1988 The underlying model theoretic semantics of each theory is partially axiomatised From the axiomatisations all the paradigmatic inferences of each theory can be proved in a purely deductive manner This is demonstrated by a number of rigorous proofs of natural language inferences Finally some methodological issues are raised Both theories recommend a particular approach within formal semantics for natural language I explore the methodological views underlying the theories

and discuss whether the authors actually follow the methods which they recommend
