**Auravana Lifestyle System** Auravana,2022-07-12 This publication is the Lifestyle System for a community type society A lifestyle system describes the common behavioral orientations and interests of individuals among society while identifying the cycles to which they entrain and that make up the daily motion of their lives A lifestyle is how individuals spend their time it is their pattern of living in the world as expressed by their activities interests and fundamental understandings about work and play In part a lifestyle refers to the decided timing of activities in individuals lives This standard provides a reasoned reflection on the lifestyle of individuals in a community type society It logically derives and discursively argues for a life experience that all humanity has in common Humans participate in communities of practice we all have interests and needs we all contribute through our participation we all seek self

integration and self development we are all active sometimes and inactive at other times we all discover and adapt through our experiences we all have routine patterns of behavior and we all entrain to a cycle s Herein learning is something individuals do through life experience and something which influences life experience What would your life be like in community where goods and services are coordinated to be accessible without the need for any form of exchange or coercion What is an optimal way of living in the world It is interesting to think about what a lifestyle might be like in a society oriented toward self development and contribution and not stratified by financial trade accounting or the power positioning of oneself over others
