Adamson, Kenneth C. Mansfield, James L. Antonakos, 1997 Assuming no prior programming experience this edition introduces the concept of structured programming through BASIC and includes coverage of QBASIC It uses BASIC to teach the good programming habits required by higher level languages such as C or Pascal and presents programming in a manner that requires consistent program structure and uses top down design It includes examples and problems presented in the context of technical applications with each area of technology clearly defined to stimulate student interest and illustrates new concepts by guiding students through fundamental examples rather than bogging them down in mathematical complexities or technical details *Fundamentals of BASIC Programming* Steven L. Mandell, Colleen J. Mandell, 1985 A textbook

emphasizing structured programming as it explains how to use the computer language BASIC to write fundamental programs Includes vocabulary lists learning checks summary points tests and a glossary **Structuring Programs in Microsoft BASIC** Michael J. Cox, 1986 **Structured BASIC Programming for the IBM and MS-DOS PCs** Sang-jin Yu, Steven L. Mandell, 1988 **Structured Programming with COBOL Examples** Earl H. Parsons, 2002-11 As the conversion of legacy

systems continues the ability to understand embedded business rules becomes more and more critical This ability is directly related to the structure of the programs within those systems We also see the need to teach structured programming to a new generation of programmers who must maintain the billions of lines of existing COBOL code The ultimate purpose of this text is to discuss how to judge the level of structure of a program We do this by defining structured programming and then discussing how a structured program can be built through the application of the concepts of coupling and cohesion We also show how embedded business rules of the program can be separated from the data and presentation functions The reader will be able to use to these skills to judge and to improve the structure of a new program or an existing program
