The Private World of Soviet Scientists from Stalin to Gorbachev Maria Rogacheva,2017-07-10 Rogacheva sheds new light on the complex transition of Soviet society from Stalinism into the post Stalin era Using the case study of Chernogolovka one of dozens of scientific towns built in the USSR under Khrushchev she explains what motivated scientists to participate in the Soviet project during the Cold War Rogacheva traces the history of this scientific community from its creation in 1956 through the Brezhnev period to paint a nuanced portrait of the living conditions political outlook and mentality of the local scientific intelligentsia Utilizing new archival materials and an extensive oral history project this book argues that Soviet scientists were not merely bought off by the Soviet state but that they bought into the idealism and social optimism of the post Stalin regime Many shared the regime s belief in the progressive development of Soviet society on a scientific basis and embraced their increased autonomy material privileges and elite status   The Department of State Bulletin ,1963 The official monthly record of United States foreign policy   **Hearings Before the Committee on Naval Affairs of the House of Representatives on Sundry Legislation Affecting the Naval Establishment 1921** United States.
