## **Spoiled Climate:**

**Spoiled Climate** Andreas Ruby, 2004 Architectural projects which expose the hidden contradictions of our everyday reality in a lively yet challenging way Francois Roche born in 1961 in Paris and his partner Stephanie Lavaux born in 1966 on the Reunion Island are radical advocates of an architecture which is to be perceived as a tool for increasing critical awareness as a discipline which provokes thought and inspires the imagination Their buildings and projects which include the new art museum in Bangkok and the Glacier Museum in Switzerland both of which would have been unthinkable without the latest IT methods of design strive towards designs which are unique and unmistakeable in both function and appearance Francois Roche is guest professor at the London Bartlett School and the Technical University of Vienna and has made a name for himself internationally as a pioneer of a new architecture through his lecture activities and his participation in many exhibitions This monograph is the first complete overview of his work and will be published to coincide with the exhibition No Standard Architecture which opens in November at the Centre Pompidou in Paris where R Sie architects are one of the 12 invited architectural firms

*Justice Across Generations* Ryan Reed, Christopher R. Hallenbrook, 2025-10-28 This book presents a contractualist theory of intergenerational justice that avoids deficiencies in existing IGJ theories e.g. the non identity problem and the under defining of generations The inability of social contract theory to provide a thorough accounting of justice between generations has been called an embarrassment and rightly so That said serious attempts have been made from a variety of contract perspectives to rectify the approach's shortcomings in the area of intergenerational justice One of the most prominent contract theorists John Rawls attempted to address justice between generations in his theory via his just savings principle but both versions of it were met with stinging criticism As the climate crisis among other challenges presses the issue of justice for future generations the authors believe that intergenerational justice is something that social contract theory should and can address Specifically they present a Rawlsian approach that begins with a clarified understanding of what is meant by generations and proceeds from there to modify generational knowledge constraints in the original position The authors then draw upon the concept of indirect reciprocity to round out an argument for a Rawlsian principle of justice between generations intergenerational fair equality of opportunity They then apply their intergenerational justice theory to five major public policy areas

**Environmental Change and the World's Futures** Jonathan Paul Marshall, Linda H. Connor, 2015-08-27 Climate change and ecological instability have the potential to disrupt human societies and their futures Cultural social and ethical life in all societies is directed towards a future that can never be observed and never be directly acted upon and yet is always interacting with us Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience The three key ideas of this book ecologies ontologies and mythologies help us understand the ways people in many different societies attempt to predict and shape their futures Each chapter places a different emphasis on the linked domains of environmental change
