Financial Reporting, 3rd Edition Janice Loftus, Ken Leo, Sorin Daniliuc, Noel Boys, Belinda Luke, Hong Nee Ang, Karyn Byrnes, 2020-02-25 The third edition of Loftus Financial Reporting has been updated for recent developments in the Australian Accounting Standards including the release of the new Conceptual Framework This text is designed to be used across the 2nd and 3rd year financial accounting units A hallmark feature of the text is that it provides both a conceptual understanding and a practical application of the accounting standards For students an understanding of the conceptual basis of accounting and the rationale behind the principles is crucial to the consistent application of standards in a variety of practical contexts The Financial Reporting interactive e text features a range of instructional media content designed to provide students with an engaging learning experience This includes practitioner videos from Ernst Young interactive worked problems and questions with immediate feedback Loftus unique resource can also form the basis of a blended learning solution for lecturers

Game Theory: A Nontechnical Introduction To The Analysis Of Strategy (3rd Edition)

Roger A McCain, 2014-04-29 The objective of the third edition of Game Theory A Nontechnical Introduction to the Analysis of Strategy is to introduce the ideas of game theory in a way that is approachable intuitive and interdisciplinary Relying on the Karplus Learning Cycle the book is intended to teach by example Noncooperative equilibrium concepts such as Nash equilibrium play the central role In this third edition increased stress is placed on the concept of rationalizable strategies which has proven in teaching practice to assist students in making the bridge from intuitive to more formal concepts of noncooperative equilibrium The Instructor Manual and PowerPoint Slides for the book are available upon request for all instructors who adopt this book as a course text Please send your request to sales wpsc com

COMPANY VALUATION

UNDER IFRS - 3RD EDITION Nick Antill, Kenneth Lee, Deborah Taylor, 2020-02-11 Revised and updated The influence of International Financial Reporting Standards IFRS on accounting across the world is stronger than ever Most importantly this stems from the mandatory adoption of IFRSs in many parts of the world including Europe Canada Australia Brazil and with some relatively small exceptions China Additionally foreign registrants in the US are also permitted to use IFRS by the SEC The impact of IFRSs also extends to accounting developments as the IASB and the FASB work closely together to formulate new standards such as those recently issued on leasing and revenue recognition It is clear that investors analysts and valuers need to understand financial statements produced under IFRS to feed in to their valuations and broader investment decisions Written by practitioners for practitioners the book addresses valuation from the viewpoint of the analyst the investor and the corporate acquirer It starts with valuation theory what is to be discounted and at what discount rate It explains the connection between standard methodologies based on free cash flow and on return on capital And it emphasizes that whichever method is used accurate interpretation of accounting information is critical to the production of sensible valuations The authors argue that forecasts of cash flows imply views on profits and balance sheets and that non cash items

contain useful information about future cash flows so profits matter The book addresses the implications for analysis modelling and valuation of key aspects of IFRS all updated for recent developments including Pensions Stock options Derivatives Provisions Leases Revenue recognition Foreign currency The text also sets out the key differences between IFRS and US GAAP treatments of these issues in addition to their implications for analysis A detailed case study is used to provide a step by step valuation of an industrial company using both free cash flow and economic profit methodologies The authors then address a range of common valuation problems including cyclical or immature companies as well as the specialist accounting and modelling knowledge required for regulated utilities resource extraction companies banks insurance companies real estate companies and technology companies Accounting for mergers and disposals is first explained and then illustrated with a detailed potential acquisition
