Transactions And Change In Logic Databases:

Transactions and Change in Logic Databases Burkhard Freitag,1998-10-28 This book constitutes the thoroughly refereed and revised post workshop proceedings of two international meetings devoted to deductive databases and logic programming The technical papers presenting original research results were carefully reviewed and selected for inclusion in the present book together with several survey articles summarizing the state of the art in the area Thus the book is the ultimate reference for anybody interested in the theory and application of deductive databases and logic programming

Doorn, Laura C. Rivero, 2002 An effective database system should satisfy at least three basic integrity restrictions unique keys null restricts and a special case of inclusion dependancies that allows the design of hierarchies and relationships over class entities This text addresses these and a variety of other issues *Proceedings International Computer Software and Applications Conference*, 1999 **Logical Foundations for Cognitive Agents** Hector J. Levesque, 1999-06-07 It is a pleasure and an honor to be able to present this collection of papers to Ray Reiter on the occasion of his 60th birthday To say that Ray's research has had a deep impact on the field of Artificial Intelligence is a considerable understatement Better to say that anyone thinking of doing work in areas like deductive databases default reasoning diagnosis reasoning about action and others should realize that they are likely to end up proving corollaries to Ray's theorems Sometimes studying related work makes us think harder about the way we approach a problem studying Ray's work is as likely to make us want to drop our way of doing things and take up his This is because more than a mere visionary Ray has always been a true leader He shows us how to proceed not by pointing from his armchair but by blazing a trail himself setting up camp and waiting for the rest of us to arrive The International Joint Conference on Artificial Intelligence clearly recognized this and awarded Ray its highest honor the Research Excellence award in 1993 before it had even finished acknowledging all the founders of the field The papers collected here sample from many of the areas where Ray has done pioneering work One of his earliest areas of application was databases and this is reflected in the chapters by Bertossi et al and the survey chapter by Minker Database Processing David M. Kroenke, 2000 For undergraduate courses in Database Design Introduction to Database Management and Database Management and Design in departments of Business Computer

Information Systems and Computer Science The text provides a solid foundation in the fundamentals of database processing It is organized into several parts beginning with the core components of database processing including building databases and related applications data modeling and progresses to the transformation of data models into relational database designs Relational database implementation is discussed in the ensuing sections Key technological advances are thoroughly discussed such as the expanding Internet and organizational intranet technology and its role and function within application publishing The concluding parts deal with database processing and object oriented DBMS technology **IJCAI** ,2001
