Strong and Weak Stabilizability Wendell Masanobu Miyaji,1988 This theses addresses the problem of determining stabilizing controls for distributed parameter systems The focus is on controls which provide strong or weak stabilization to the system One approach to the stabilization of finite dimensional systems and exponential stabilization of infinite dimensional systems has been the use of Lyapunov type functionals This is one technique which is developed and extended here to provide new conditions for strong or weak stability A new functional is presented and if this functional is strictly positive a certain semigroup will be strongly stable This functional suggests an inequality relation which if satisfied guarantees the weak stability of uniformly bounded semigroups The relationship between contraction semigroups is examined on a Hilbert space and shift semigroups on a related Hilbert space In particular strongly stable semigroups are

found to be equivalent in a certain sense to a backward shift semigroup This provides an alternative view point for strong stability Since stable semigroups are uniformly bounded and since this condition is important in verifying stability we examine this phenomena Some new observations are presented to illustrate conditions under which perturbations of uniformly bounded semigroups remain uniformly bounded jhd Robust Control Peter Dorato,1987 *Distributed Parameter Systems* Franz Kappel,Karl Kunisch,Wilhelm Schappacher,1987-10-28 This volume comprises the proceedings of the 3rd International Conference on Distributed Parameter Systems held at the Chorherrenstift Vorau Styria July 6 12 1986 The aim of the meeting was to stimulate exchange of information between scientists working in the field of distributed parameter systems The papers included in the proceedings present recent results and most of them include a survey on the background of the problem Main topics considered in these papers are boundary control for hyperbolic systems linear quadratic control problems robustness stabilization visco elastic and flexible structures hereditary systems Distributed Parameter Systems Tanehiro Futagami,S.
