Zvacek,Sharon Smaldino,2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational

Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field   Distance Education Michael Corry,2012-11-12 Don t start from scratch Learn what worksand what doesn tin providing education to off campus students This unique compilation presents practical advice on how to set up distance learning programs that effectively serve the needs of students who don t have access to the campus The book examines issues surrounding development implementation teacher training time management and other important aspects of distance education Distance Education What Works Well brings you lessons garnered from real life experiences at several institutions to help you explore the pros and cons of distance educationand what it takes to implement a distance program that really works In the first half of Distance Education What Works Well you ll examine the development of a digital high schoolfrom the early stages through rookie camp experiences practical recommendations on how to design successful online high school programs what has worked welland what has notin terms of distance education in the rural K 12 environment the successful and not so successful aspects of an innovative distance education project that encourages collaboration between high schools and middle schools The second half of this informative book presents practical advice to help you set up distance learning programs that make the most of available technology You ll learn how to train faculty to effectively use distance education techniques the importance of student teacher and student student interaction in a distance education settingand how to build active online communities that keep students and faculty in touch the roles and functions of moderators in online educationand the skills they need to be effective six effective tactics designed to optimize online time how to decide whether distance education is the right choice for you
