Radar Data Processing With Applications He You,Xiu Jianjuan,Guan Xin,2016-08-01 Radar Data Processing with Applications Radar Data Processing with Applications He You Xiu Jianjuan Guan Xin Naval Aeronautical and Astronautical University China A summary of thirty years worth of research this book is a systematic introduction to the theory development and latest research results of radar data processing technology Highlights of the book include sections on data pre processing technology track initiation and data association Readers are also introduced to maneuvering target tracking multiple target tracking termination and track management theory In order to improve data analysis the authors have also included group tracking registration algorithms and a performance evaluation of radar data processing Presents both classical theory and development methods of radar data processing Provides state of the art research results including data processing for modern radars and tracking performance evaluation theory Includes coverage of performance evaluation registration algorithm for radar networks data processing of passive radar pulse Doppler radar and phased array radar Features applications for those engaged in information engineering radar engineering electronic countermeasures infrared techniques sonar techniques and military command Radar Data Processing with Applications is a handy guide for engineers and industry professionals specializing in the development of radar equipment and data processing It is also intended as a reference text for electrical engineering graduate students and researchers specializing in signal processing and radars

Situation Assessment in Aviation Jitendra R. Raol,Sudesh K. Kashyap,Lakshmi Shrinivasan,2024-02-29 Situation Assessment in Aviation focuses on new aspects of soft computing technologies for the evaluation and assessment of situations in aviation scenarios It considers technologies emerging from multisensory data fusion MSDF Bayesian networks BN and fuzzy logic FL to assist pilots in their decision making Studying MSDF BN and FL from the perspective of their applications to the problem of situation assessment the book discusses the development of certain soft technologies that can be further used for devising more sophisticated technologies for a pilot s decision making when performing certain tasks airplane monitoring pair formation attack and threat It explains the concepts of situation awareness data fusion decision fusion Bayesian networks fuzzy logic type 1 and interval type 2 fuzzy logic The book also presents a hybrid technique by using BN and FL and a unique approach to the problem of situation assessment beyond visual range and air to air combat by utilizing building blocks of artificial intelligence AI for the future development of more advanced automated systems especially using commercial software The book is intended for aerospace R D engineers systems engineers aeronautical engineers and aviation training professionals It will also be useful for aerospace and electrical engineering students taking courses in Air Traffic Management Aviation Management Aviation Operations and Aviation Safety Systems **Methods and Techniques in Deep Learning** Avik Santra,Souvik Hazra,Lorenzo Servadei,Thomas Stadelmayer,Michael Stephan,Anand Dubey,2022-12-08 Methods and Techniques in Deep Learning Introduces multiple state of the art deep learning architectures

for mmWave radar in a variety of advanced applications Methods and Techniques in Deep Learning Advancements in mmWave Radar Solutions provides a timely and authoritative overview of the use of artificial intelligence AI based processing for various mmWave radar applications Focusing on practical deep learning techniques this comprehensive volume explains the fundamentals of deep learning reviews cutting edge deep metric learning techniques describes different typologies of reinforcement learning RL algorithms highlights how domain adaptation DA can be used for improving the performance of machine learning ML algorithms and more Throughout the book readers are exposed to product ready deep learning solutions while learning skills that are relevant for building any industrial grade sensor based deep learning solution A team of authors with more than 70 filed patents and 100 published papers on AI and sensor processing illustrates how deep learning is enabling a range of advanced industrial consumer and automotive applications of mmWave radars In depth chapters cover topics including multi modal deep learning approaches the elemental blocks required to formulate Bayesian deep learning how domain adaptation DA can be used for improving the performance of machine learning algorithms and geometric deep learning are used for processing point clouds In addition the book Discusses various advanced applications and how their respective challenges have been addressed using different deep learning architectures and algorithms Describes deep learning in the context of computer vision natural language processing sensor processing and mmWave radar sensors Demonstrates how deep parametric learning reduces the number of trainable parameters and improves the data flow Presents several human machine interface HMI applications such as gesture recognition human activity classification human localization and tracking in cabin automotive occupancy sensing Methods and Techniques in Deep Learning Advancements in mmWave Radar Solutions is an invaluable resource for industry professionals researchers and graduate students working in systems engineering signal processing sensors data science and AI   *Modeling and Simulation-Based Data Engineering* Bernard P. Zeigler,Phillip E Hammonds,2007-08-07 Data Engineering has become a necessary and critical activity for business engineering and scientific organizations as the move to service oriented architecture and web services moves into full swing Notably the US Department of Defense is mandating that all of its agencies and contractors assume a defining presence on the Net centric Global Information Grid This book provides the first practical approach to data engineering and modeling which supports interoperabililty with consumers of the data in a service oriented architectures SOAs Although XML eXtensible Modeling Language is the lingua franca for such interoperability it is not sufficient on its own The approach in this book addresses critical objectives such as creating a single representation for multiple applications designing models capable of supporting dynamic processes and harmonizing legacy data models for web based co existence The approach is based on the System Entity Structure SES which is a well defined structure methodology and practical tool with all of the functionality of UML Unified Modeling Language and few of the drawbacks The SES originated in the formal representation of hierarchical simulation models So it provides an axiomatic formalism that enables automating the development of XML dtds
