The assumption that the child is biologically equipped with fundamental linguistic knowledge can additionally be justified with the fact that deaf children babble Goodluck 1991 141 The study of first language acquisition is as complex as the process itself since there are different theories and approaches and most importantly because language acquisition differs cross linguistically and individually The paper explains how English speaking children start to acquire past tense structures and elucidates the patterns in which regular and irregular past tense forms are acquired This is particularly interesting because children s acquisition of relational terms like verbs has only recently been studied in greater detail Behrens 2001 451 **Collins Introducing English to Young Children: Spoken Language** Opal Dunn,2014-01-02 A practical teacher guide book for teaching spoken English to young children *Teaching Dull and Retarded Children* Annie Dolman Inskeep,1926 Helping Young Children Learn Language and Literacy Carol Vukelich,James F.
