The Magical Tarot of the Golden Dawn Chris Zalewski, Pat Zalewski, 2019-01-22 The last word on the tarot of the Golden Dawn this veritable encyclopedia covers every aspect of the cards The authors stress experimentation with the tarot which is a mark of a vibrant magical system The descriptions of each tarot card are very reliable and very complete Of particular interest are the alchemical associations and the authors work on the gematria or numerology of each card For the first time a complete alchemical system is given for the whole deck There is also a good deal of added astrological information and divinatory meanings and interpretations Several excellent suggestions for studying and meditating on the cards are provided by the authors This book is a balanced combination of both historical and new material presented by the Zalewskis that stands firmly rooted in Golden Dawn teachings and ritual practice There are many interesting new innovations in this book Fully illustrated by Golden Dawn member and professional artist Skip Dudchous this new 2019 edition has been completely re edited and re formatted for ease of reading It will be an invaluable resource for those interested in the tarot of the Golden Dawn

Politics and Economics of Tropical High Forest Management Thorsten Treue, 2012-12-06 For the last two decades the loss of in particular tropical rainforest has alarmed the public in the developed parts of the world The debate has been characterised by a lack of understanding of the causes and effects of the process leading to the prevailing reaction being unqualified condemnation Such attitude has even been observed among scientists claiming supremacy to biodiversity conservation Many scientific analyses are available but the basis for sober debates and appropriate actions is still highly insufficient Two recent international initiatives will hopefully lead to improved knowledge of deforestation and forest degradation as they recognise the need for studies to critically investigate those issues This book will provide useful input to the initiatives In my opinion the scientific analyses have not sufficiently promoted the understanding that the fate of tropical forests is first and foremost a concern of the governments of the countries in which the forests are situated Tropical forests may be important to the global environment and their rich biodiversity may be a human heritage But their main importance is their potential contribution to improving livelihood in the countries in question
