University Reform Today:

The New Conservatism Jürgen Habermas, 2015-10-07 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences. The New Conservatism brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes. The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular. The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries. The central theme uniting the essays is the German problem of coming to terms with the past a problem that has important implications outside Germany as well. Of particular note are the essays on what has come to be known as the Historians' Debate. Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy. Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America. In particular the essay on *The New Obscurity* combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today.

State and Market in Higher Education Reforms Hans G. Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05 Universities have never been static. Even so it is fair to say they have experienced a most radical transformation in the past twenty years. During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence. But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research. The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability. Education and post secondary education especially are increasingly seen as matters for markets. Formal post secondary education becomes a service commercialized and traded across national borders. This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives. Chapter authors describe and analyze government reforms and other developments that have directly or indirectly affected this relationship. Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide.
