Learning Linux Shell Scripting Ganesh Sanjiv Naik, 2015-12-31
Unleash the power of shell scripts to solve real world problems by breaking through the practice of writing tedious code
About This Book
Learn how to efficiently and effectively build shell scripts and develop advanced applications with this handy book
Develop high quality and efficient solutions by writing professional and real world scripts and debug scripts by checking and shell tracing
A step by step tutorial to automate routine tasks by developing scripts from a basic level to very advanced functionality
Who This Book Is For
This book is ideal for those who are proficient at working with Linux and who want to learn about shell scripting to improve their efficiency and practical skills
By the end of this book you will be able to confidently use your own shell scripts in the real world
What You Will Learn
Familiarize yourself with the various text filtering tools available in Linux
Combine the fundamental text and file processing commands to process data and automate repetitive tasks
Understand expressions and variables and how to use them practically
Automate decision making and save a lot of time and effort of revisiting code
Get to grips with advanced functionality such as using traps and signals and using dialogs to develop screens
Start up a system and customize a Linux system
Take an in depth look at regular expressions and pattern matching to understand the capabilities of scripting
In Detail
Linux is the one of the most powerful and universally adopted OSes
Shell is a program that gives the user direct interaction with the operating system
Scripts are collections of commands that are stored in a file
The shell can read this file and act on the commands as if they were typed on the keyboard
Shell scripting is used to automate day to day administration and for testing or product development tasks
This book covers Bash GNU Bourne Again SHell preparing you to work in the exciting world of Linux shell scripting
We start with an introduction to the Shell environment and explain basic commands used in Shell
Next we move on to check kill and control the execution of processes in Linux OS
Further we teach you about the filter tools available in Linux and explain standard
