Andrew Madsen Smith

Summer Token:

The Smart Set George Jean Nathan, Henry Louis Mencken, 1906 **The Smart Set**, 1906 **A Token's View from Inside the Internal Revenue Service** Oscar Williams, 2000-02 This book is a humorous satire about the inner fumbling bumbling and sometimes just plain chaos which the Internal Revenue Service would like to keep away from the public eyes A few of the things which this book illustrates are a failed equal employment opportunity program an antiquated payroll system which kept the employees in turmoil an awards program which gave away hundreds of thousands of tax payer dollars just because employees came to work or because of the color of their skin failed management development programs which cost the taxpayers millions of dollars and the whimsical expensive penchant the IRS has for chasing today's fads and abandoning them when the new ones come along These are a few items in the book but there are many more which will leave the readers shaking their heads in disbelief There are no technical tax matters in the book The author describes the events in an easy going conversational style It is guaranteed to make the readers laugh at the inept IRS management system and at times it might make the readers a little bit angry when they see how their hard earned tax dollars are foolishly squandered

Overview The 1st of the book describes how Bitcoin started as a peer to peer payment system and how the first crypto bubble was facilitated by onramp payment companies in 2011 which mainly funneled money into the notorious Mt Gox exchange eventually leading to investors funds being stolen The 2nd analyzes how China embraced Bitcoin and hailed it as a new form of money which set off a massive speculative bubble in 2013 The 3rd describes how Ethereum got really started and set off the period of initial coin offerings ICOs that would lead to the third bull market in 2017 It also identifies the decisions that caused Tether to become the most important stablecoin The 4th of the book shows how decentralized finance DeFi started and how the speculative mania that was set off by the COVID stimulus checks would reach its peak Binance became the largest crypto exchange despite its controversies and effectively dethroned BitMEX as the most important crypto exchange The crypto trading firms Alameda Research and Three Arrows Capital also became multi billion dollar players in the crypto bull market The 5th of the book takes a deep dive into the 2022 bear market exploring how crypto spectacularly crashed from a multi trillion dollar valuation and why the implosion of the Terra stablecoin caused 60bn to vanish within a few days The 6th contemplates the events that led to the implosion of Sam Bankman Fried s crypto exchange FTX once valued at 32bn after a meteoric 4yr rise
