*Photography: The Art of Deception* ,2016-10-17 Photography is a lie Just think about it photographers create two dimensional images that sometimes even lack color and then expect everyone who views the image to believe that this is how the subject and scene appeared in front of the lens in real life What is truly amazing is that people fall for the visual trickery readily almost as if they want to be deceived It gets better people still believe that one can

photograph only what is really there In this book Irakly Shanidze reveals the smoke and mirrors that the best photographers use to surprise entertain and inspire viewers He explains that the individual features of photographer s perception and technical limitations of his equipment make him do things that may eventually make a picture look very different from how a viewer would see the same scene with a naked eye and can lead to a ruined picture Conversely photographers who understand these phenomena can use the aforementioned constraints to deliberately adjust the level of truthfulness in their pictures In each beautifully illustrated chapter Shanidze discloses the photographic tools that enterprising photographers can use to create visual deception e g to create a sense of dimension create day for night effects establish mood simulate candid photographs and generally suspend disbelief without the time consuming post processing In doing so he describes the image objectives in other words defines the image concepts and introduces the tools needed to achieve them whether a lens of a certain focal length a light of a specific wattage or a given shutter speed He also deconstructs some of his favorite images to show readers how he was able to create a chiseled deception of his own Armed with this book photographers will learn to truly take the reins in their photographic pursuits and deliver supercharged iconic storytelling images

components rather than something solid Anatta is a truth the Buddha considered to be absolutely essential to his teaching Smith shows that understanding this truth can change the way you relate to the world and that the perspective of selflessness is critically important for anyone involved in spiritual practice Seeing it can be the key to getting past the idea that spirituality has something to do with self improvement and to accessing the joy of deep insight into reality
