Talk About Design:

Talk about Design James Pilditch, 1976 **What We Talk About When We Talk About Graphic Design** Jarrett Fuller, 2017 What We Talk About When We Talk About Graphic Design is a multi platform project interested in the intersection of design criticism and practice Through a weekly podcast called Scratching the Surface I interviewed designers writers critics educators and curators about the role of design criticism writing and discourse in the design profession By creating a survey of contemporary design discourse the podcast seeks to find new ways to talk about graphic design This content was then expanded into books an online publication and an exhibition of critical graphic design Designing Communities Wolff-Michael Roth, 2012-12-06 The study described in this book arose in the context of a three year collective effort to bring about change in science teaching at Mountain Elementary School 1 This opportunity emerged after I contacted the school with the idea to help teachers implement student centered science teaching At the same time the teachers collectively had come to realize that their science teaching was not as exciting to children as it could be They had recognized their own teaching as textbook based with little use of the hands on approaches prescribed by the provincial curriculum At this point the teachers and I decided that a joint project would serve our mutual goals they wanted assistance in changing from textbook based approaches to student centered activities I wanted to collect data on learning in student centered knowledge producing classroom communities I brought to this school my new understandings about classroom communities from several earlier studies conducted in a private high school e g Roth Roth Roychoudhury 1992 I wanted to help teachers create science learning environments in which children took charge of their learning where children learned from more competent others by participating with them in ongoing activities and teachers were responsible for setting up and maintaining a classroom community rather than for disseminating information After I had completed the data collection for the present study I watched a documentary about an elementary school in the small French village of Moussac Envoye Special TV5 September 14 1994 *Design*, 1977 *An Introduction to Conversation Analysis* Anthony J. Talking Science Wolff-Michael Roth,2005-05-26 This book is about the fundamental nature of talk in school science Language as a formal system provides resources for conducting everyday affairs including the doing of science And while writing science is one aspect talking science may in fact constitute a much more important means by which we navigate and know the world the very medium through which we do science In Talking Science Wolff Michael Roth articulates a view of language that differs from the way science educators generally think about it Knowing language in this view is no longer distinct from knowing one s way around a particular section of the world It is a non representational view of language and dispenses with language as a barrier between the individual subject and the world it knows In addition the book includes detailed analyses from actual classrooms to exemplify what such a different approach means for science education The conclusion is that once we have learned new ways of articulating the world and talking about it we also have learned to handle this world more easily
