The Magic Moment

Arthur Quiller-Couch

The Magic Moment:

Comprehension Processes in Reading David A. Balota, G.B. Flores d'Arcais, Keith Rayner, 2012-11-12 *Comprehension Processes in Reading* addresses the interrelationship among several areas relevant to understanding how people comprehend text. The contributors focus on the on-line processes associated with text understanding rather than simply with the product of that comprehension: what people remember from reading. Presenting the latest theories and research findings from a distinguished group of contributors, *Comprehension Processes in Reading* is divided into four major sections. Each section concluding with a commentary chapter discusses a different aspect of reader understanding or dysfunction such as individual word comprehension, sentence parsing, text comprehension, and comprehension failures and dyslexia. *The Cambridge Handbook of Psycholinguistics* Michael Spivey, Marc Joanisse, Ken McRae, 2012-08-20 This comprehensive collection of chapters is written by leading researchers in psycholinguistics from a wide array of subfields. *Full Circle* Tsunoyota Kohe't, 2002 [From Inkmarks to Ideas](#) Sally Andrews, 2010-12-14 Reading is one of the most sophisticated demonstrations of human pattern recognition and symbolic processing skill. Skilled readers effortlessly comprehend written text at rates of at least 300 words per minute despite the complex interactions between perceptual, cognitive, and memory processes required for effective comprehension. Understanding how we achieve this remarkable feat has been a focus of investigation since the birth of experimental psychology. Over the last two decades, visual word recognition has been at the forefront of developments in cognitive science. This book brings together many of the most influential contributors to these developments to reflect on current issues in the cognitive science of lexical processing and the methods required for further progress. The first section focuses on computational models. Written words provide a fertile context for large-scale modeling, and the domain of lexical retrieval has become a test bed for evaluating competing theoretical frameworks. The later sections draw upon cognitive psychology, linguistics, philosophy, computer science, and neuroscience to elaborate critical theoretical issues and to develop novel research tools. *From Inkmarks to Ideas* provides advanced students and researchers with a comprehensive overview of the critical theoretical and empirical controversies in current research on the cognitive science of lexical processing and reading. *Transformative Phenomenology* David Allan Rehorick, Valerie Malhotra Bentz, 2008-01-01 The fourteen authors in this collection used phenomenology—the study of consciousness and hermeneutics—the interpretation of meaning to conduct deep inquiry into perplexing and wondrous events in their work and personal lives. These seasoned scholar-practitioners gained remarkable insight into areas such as health care and illness, organ donation, intercultural communications, high performance teams, artistic production, jazz improvisation, and the integration of Tai Chi into education. All authors were transformed by phenomenology's expanded ways of seeing and being. [At Home and Abroad](#), 1913
