**At the Cutting Edge 2009** David L. Callies,2010      **The Encyclopedia of Housing, Second Edition** Andrew T. Carswell,2012-05-31 Since publication of the groundbreaking Encyclopedia of Housing in 1998 many issues have assumed special prominence within this field and indeed within the global economy For instance the global economic meltdown was spurred in large part by the worst subprime mortgage crisis we ve seen in our history On a more positive note the sustainability movement and green development has picked up considerable steam and given the priorities and initiatives of the current U S administration this will only grow in importance and increased attention has been given in recent years to the topic of indoor air quality Within the past decade as well the Baby Boom Generation began its march into retirement and senior citizenship which will have increasingly broad implications for retirement communities and housing assisted living facilities aging in place livable communities universal design and the like Finally within the last twelve years an emerging generation of young scholars has been making significant contributions to the field For all these reasons and more we are pleased to present a significantly updated and expanded Second Edition of The Encyclopedia of Housing      Proceedings of the 23rd International Symposium on Advancement of Construction Management and Real Estate Fenjie Long, Sheng Zheng, Yuzhe Wu, Gangying Yang, Yan Yang, 2021-02-02 This book presents the proceedings of CRIOCM2018 23rd International Symposium on Advancement of Construction Management and Real Estate sharing the latest developments in real estate and construction management around the globe The conference was organized by the Chinese Research Institute of Construction Management CRIOCM working in close collaboration with Guizhou Institute of Technology GIT Written by international academics and professionals the proceedings discuss the latest achievements research findings and advances in frontier disciplines in the field of construction management and real estate Covering a wide range of topics including New type urbanization land development and land use urban planning and infrastructure construction housing market and housing policy real estate finance and investment new theories and practices on construction project management smart city BIM technologies and applications construction management in big data era green architecture and eco city rural rejuvenation and eco civilization other topics related to construction management and real estate the discussions provide valuable insights into the advancement of construction management and real estate in the new era The book is an outstanding reference resource for academics and professionals alike      **Eco-Towers** K. Al-Kodmany, 2015-05-05 Eco Towers introduces readers to groundbreaking designs most progressive projects and innovative ways of thinking about a new generation of green skyscrapers that could provide solutions to crises the world faces today including climate change depleting resources deteriorating ecology population increase decreasing food supply urban heat island effect pollution deforestation and more The book suggests that the eco tower culminates the cultural and technological evolutions of the 21st century by building and improving on the experiences of earlier designs of skyscrapers and philosophies particularly green

sustainable and ecological It argues that the true green skyscraper is the one that engages successfully with its larger urban context by establishing symbiotic relationships with the social economic and environmental aspects Since tall buildings are becoming larger and taller serving greater number of people and exerting higher demand on the environment and existing infrastructure any improvements in their design and construction will significantly enhance urban conditions The book elucidates how green skyscrapers better serve tenants mitigate environmental impacts and improve integration with the city infrastructure It explains how skyscrapers long life cycle offers the greatest justifications for recycling precious resources and makes it a worthwhile to employ green features in constructing new skyscrapers and retrofitting existing ones Subsequently the book explores new designs that are employing cutting edge green technologies at a grand scale including water saving technologies solar panels helical wind turbines sunlight sensing LED lights rainwater catchment systems graywater and blackwater recycling systems seawater powered air conditioning and the like In the future new building materials and smart technologies will continue to offer innovative design approaches to sustainable tall buildings with new aesthetics referred to as eco iconic skyscrapers [Swanepoel Trends Report 2009](#) Stefan Swanepoel,2009-02
