Uncertainty Management In Information Systems:

Uncertainty Management in Information Systems Amihai Motro,Philippe Smets,2012-12-06 As its title suggests Uncertainty Management in Information Systems is a book about how information systems can be made to manage information permeated with uncertainty This subject is at the intersection of two areas of knowledge information systems is an area that concentrates on the design of practical systems that can store and retrieve information uncertainty modeling is an area in artificial intelligence concerned with accurate representation of uncertain information and with inference and decision making under conditions infused with uncertainty New applications of information systems require stronger capabilities in the area of uncertainty management Our hope is that lasting interaction between these two areas would facilitate a new generation of information systems that will be capable of servicing these applications Although there are researchers in information systems who have addressed themselves to issues of uncertainty as well as researchers in uncertainty modeling who have considered the pragmatic demands and constraints of information systems to a large extent there has been only limited interaction between these two areas As the subtitle From Needs to Solutions indicates this book presents view points of information systems experts on the needs that challenge the uncer tainty capabilities of present information systems and it provides a forum to researchers in uncertainty modeling to describe models and systems that can address these needs   **Handbook of Software Engineering & Knowledge Engineering** Shi Kuo Chang,2002 This is the first handbook to cover comprehensively both software engineering and knowledge engineering two important fields that have become interwoven in recent years Over 60 international experts have contributed to the book Each chapter has been written in such a way that a practitioner of software engineering and knowledge engineering can easily understand and obtain useful information Each chapter covers one topic and can be read independently of other chapters providing both a general survey of the topic and an in depth exposition of the state of the art Practitioners will find this handbook useful when looking for solutions to practical problems Researchers can use it for quick access to the background current trends and most important references regarding a certain topic The handbook consists of two volumes Volume One covers the basic principles and applications of software engineering and knowledge engineering Volume Two will cover the basic principles and applications of visual and multimedia software engineering knowledge engineering data mining for software knowledge and emerging topics in software engineering and knowledge engineering   **Database and Expert Systems Applications** Fernando Galindo,Makoto Takizawa,Roland Traunmüller,2004-10-29 DEXA 2004 the 15th International Conference on Database and Expert Systems Applications was held August 30 September 3 2004 at the University of Zaragoza Spain The quickly growing spectrum of database applications has led to the establisment of more specialized discussion platforms DaWaK Conference EC Web Conference EGOVConference Trustbus Conference and DEXA Workshop Every DEXA event has its own conference proceedings which were held in parallel with the DEXA Conference also in Zaragoza In your hands are

the results of much effort The work begins with the preparation of the submitted papers which then go through the reviewing process The accepted papers are revised to final versions by their authors and are then arranged within the conference program All culminates in the conference itself For this conference 304 papers were submitted and I want to thank to all who contributed to it they are the real base of the conference The program committee and the supporting reviewers produced altogether 942 referee reports in average 3 1 reports per paper and selected 92 papers for presentation At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible These were University of Zaragoza FAW DEXA Association Austrian Computer Society   Soft Computing in XML Data Management Zongmin Ma,Li Yan,2010-07-07 This book covers in a great depth the fast growing topic of techniques tools and applications of soft computing in XML data management It is shown how XML data management like model query integration can be covered with a soft computing focus This book aims to provide a single account of current studies in soft computing approaches to XML data management The objective of the book is to provide the state of the art information to researchers practitioners and graduate students of the Web intelligence and at the same time serving the information technology professional faced with non traditional applications that make the application of conventional approaches difficult or impossible   ICICKM 2019 16th International Conference on Intellectual Capital Knowledge Management & Organisational Learning John Dumay,James Guthrie,Rahat Munir,2019-12-05   **Scalable Uncertainty Management** Weiru Liu,V S Subrahmanian,Jef Wijsen,2013-09-10 This book constitutes the refereed proceedings of the 7th International Conference on Scalable Uncertainty Management SUM 2013 held in Washington DC USA in September 2013 The 26 revised full papers and 3 revised short papers were carefully reviewed and selected from 57 submissions The papers cover topics in all areas of managing and reasoning with substantial and complex kinds of uncertain incomplete or inconsistent information including applications in decision support systems machine learning negotiation technologies semantic web applications search engines ontology systems information retrieval natural language processing information extraction image recognition vision systems data and text mining and the consideration of issues such as provenance trust heterogeneity and complexity of data and knowledge   **Scalable Uncertainty Management** Eyke Hüllermeier,Sebastian Link,Thomas Fober,Bernhard Seeger,2012-09-11 This book constitutes the refereed proceedings of the 6th International Conference on Scalable Uncertainty Management SUM 2012 held in Marburg Germany in September 2012 The 41 revised full papers and 13 revised short papers were carefully reviewed and selected from 75 submissions The papers cover topics in all areas of managing and reasoning with substantial and complex kinds of uncertain incomplete or inconsistent information including applications in decision support systems machine learning negotiation technologies semantic web applications search engines ontology systems information retrieval natural language processing information extraction image recognition vision systems data and text mining and the consideration of issues such as provenance trust heterogeneity and complexity of data and knowledge
