

A photograph of a therapist and a client in a session. The therapist, on the left, is wearing glasses and a blue top, and is looking towards the client. The client, on the right, is also wearing glasses and a light-colored top, and is looking back at the therapist. They are in a room with plants and a desk with a laptop. A large green text box is overlaid on the center of the image.

New Sex Therapy Helen Singer Kaplan, 2013-10-28 First published in 1975 The last two decades have brought remarkable advances in our knowledge of human sexuality These data are in the process of being assimilated into the main body of psychiatric thought which is being greatly enriched thereby Our increased understanding of sexuality is also currently being translated into innovative new approaches to the treatment of sexual difficulties These developments promise relief to many persons with distressing sexual problems who were previously thought to be beyond help At the present time the specific approach to sex therapy described in this volume is being employed further developed and most important systematically evaluated at the Sex Therapy and Education Program of the Payne Whitney Psychiatric Clinic of the Cornell University New York Hospital Center The Cornell program is psychiatrically oriented It regards sex therapy as a specialized branch of psychotherapy The Clinic conceives of sexual dysfunctions as psychosomatic symptoms and its orientation is multicausal and eclectic in that it believes that sexual dysfunctions are the product of multiple etiologic factors and our treatment armamentarium comprises an amalgam of experiential behavioral and dynamically oriented modalities

Cognitive Psychotherapy Toward a New Millennium Tullio Scrimali, Liria Grimaldi, 2012-02-02 In the roughly two decades since Aaron T Beck published the now classic Cognitive Therapy of Depression and Michael J Mahoney declared the Cognitive Revolution much has happened What was proposed as the cognitive revolution has now become the zeitgeist and Cognitive Therapy CT has grown exponentially with each passing year A treatment model that was once seen as different strange or even alien is now commonplace In fact many people have allied themselves with CT claiming that they have always done CT Even my psychoanalytic colleagues have claimed that they often use CT After all they say Psychoanalysis is a cognitive therapy Cognitive Therapy or Cognitive Psychotherapy has become a kaleidoscope model of treatment with influences coming from many sources Some of these contributory streams have been information processing behavior therapy Constructivist psychology and dynamic psychotherapy Each of these sources have added color shading and depth to the CT model What was originally uni dimensional in terms of the CT focus on depression has become multidimensional as the CT model has been applied to virtually every patient population treatment setting and therapy context CT must now be seen as a general model of psychotherapy that with modifications can be applied to the broad range of clinical problems and syndromes What has tied these various applications of CT together is the emphasis on a strong grounding in cognitive theory a commitment to empirical support and a dedication to broadening the model

Psychotherapy Abbreviation Terry S Trepper, Helena E Papay, 2014-03-18 Psychotherapy Abbreviation is a field tested approach designed to train both experienced and student mental health professionals to do brief therapy that is effective and highly satisfactory to clients This book is unique in that it is the only text that is compatible with almost all approaches to treatment making it suitable as a primer of brief therapy usable by virtually all psychotherapists Most other

brief therapy books are affiliated with a specific theory of psychopathology making each limited to those who share the author's theoretical orientation Pekarik wrote this text based on his own brief therapy training manual because he could not find a text suitable for the wide range of psychotherapy approaches represented by the therapists whom he trains in his research teaching and consulting work By offering a unique approach derived from the active ingredients common to all forms of brief therapy and the literature on client treatment preferences Psychotherapy Abbreviation simplifies the abbreviation process and makes it accessible to all therapists Pekarik's strategies have been field tested he has used them to train hundreds of therapists who have demonstrated success with clients increased client satisfaction improved treatment effectiveness and lowered dropout rates These same therapists also doubled the proportion of cases they treated with brief therapy This how to do it text is extremely practical It assumes that the reader already has a theory and set of therapy techniques true of even most graduate students The emphasis is then placed on the treatment abbreviation process itself Because of this highly focused approach the text will like the technique it describes be concise and brief By avoiding association with any particular school of therapy Pekarik's approach is usable by all schools of therapy Therapists and future therapists now in graduate school will benefit from Psychotherapy Abbreviation as it explores these topics rationale for the abbreviation of psychotherapy practical and ethical issues to consider in client selection a conceptual model for treatment abbreviation rapid assessment and case conceptualization establishing a brief therapy focus goal establishment and negotiation adapting standard psychotherapy techniques to the brief format practice issues in brief therapy Psychotherapy Abbreviation is two part Part one is an orientation to this model of brief therapy in which Pekarik emphasizes a research based rationale for doing brief therapy presents a general theory of why brief treatments work and provides guidelines for the identification of appropriate clients for brief therapy The second part of the text is devoted to technical skills training It begins with an overview of the techniques common to most schools of brief therapy and describes a universal model of brief therapy Readers are then taken step by step through a description of the four most important abbreviation techniques presented in the typical order of use with clients To encourage readers to consistently apply the recommended techniques Pekarik includes one particular training case which he describes in detail and uses it in all of the technical skills chapters in special Case Application sections of these chapters Before describing the detailed applications Pekarik prompts readers to consider how they would apply the abbreviating technique presented in that chapter to the case With individual exercises he gives special attention to how readers can adapt their personal therapy styles and theoretical orientations to brief therapy As a result readers develop both a rationale and abbreviation strategy compatible with their values and practical needs as therapists The exercises are found in each chapter in special exercise
