Original Sin and the Evolution of Sexual Difference Megan Loumagne Ulishney, 2022-11-03 Original Sin and the Evolution of Sexual Difference develops an interdisciplinary conversation between evolutionary biology feminist philosophy and theology in order to illuminate the entanglement of Christian thinking about original sin with theologies of sexual difference It then assesses the opportunities for rethinking original sin and its implications for theologies of sexual difference in light of developments in evolutionary biology and feminist theology and philosophy Despite some resistances in the present age to conceptions of both original sin and meaningful sexual differences this study argues that both can provide essential insights that help to make sense of some of the features of human life in the twenty first century especially the stubborn persistence of inequality poverty environmental degradation and the pernicious patterns of sexual violence and abuse that have been uncovered by the MeToo movement To this end Megan Loumagne Ulishney marshals resources from a variety of places Augustine of Hippo feminist theology the Extended Evolutionary Synthesis John Paul II and a new group of feminist philosophers known as the New Feminist Materialists to develop an analysis of original sin and sexual difference that is grounded in both scientific and theological insights about creaturely life The project cultivates a sense of wonder at the diversity and unpredictability of human biology a value for the role of creativity in the human participation that partially shapes our ongoing evolution and humility about the extent to which we can predict and control the future of the evolution of our species It illuminates the interdependencies that define creaturely life the persistent entanglement of nature and culture the centrality of desire to human identity and behaviour and the role played by biology in the transmission of sin It develops a vision of material life as evolving generative and imbued with activity but also as simultaneously infected with sin and saturated with the divine

The Economics of Violence Gary M. Shiffman, 2020-01-30 How do we understand illicit violence Can we prevent it Building on behavioral science and economics this book begins with the idea that humans are more predictable than we like to believe and this ability to model human behavior applies equally well to leaders of violent and coercive organizations as it does to everyday people Humans ultimately seek survival for themselves and their communities in a world of competition While the dynamics of us vs them are divisive they also help us to survive Access to increasingly larger markets facilitated through digital communications and social media creates more transnational opportunities for deception coercion and violence If the economist s perspective helps to explain violence then it must also facilitate insights into promoting peace and security If we can approach violence as behavioral scientists then we can also better structure our institutions to create policies that make the world a more secure place for us and for future generations
