Weapons Of The Weak:

Weapons of the Weak James C. Scott, 1985-01-01 *Weapons of the Weak* is an ethnography by James C Scott that studies the effects of the Green Revolution in rural Malaysia One of the main objectives of the study is to make an argument that the Marxian and Gramscian ideas of false consciousness and hegemony are incorrect He develops this conclusion throughout the book through the different scenarios and characters that come up during his time of fieldwork in the village This publication based on 2 years of fieldwork 1978 1980 focuses on the local class relations in a small rice farming community of 70 households in the main paddy growing area of Kedah in Malaysia Introduction of the Green Revolution in 1976 eliminated 2 3 of the wage earning opportunities for smallholders and landless laborers The main ensuing class struggle is analyzed being the ideological struggle in the village and the practice of resistance itself consisting of foot dragging dissimulation desertion false compliance pilfering feigned ignorance and sabotage acts Rich and poor are engaged in an unremitting if silent struggle to define changes in land tenure mechanization and employment to advance their own interests and to use values that they share to control the distribution of status land work and grain

Weapons of the Wealthy Scott Radnitz, 2012-07-26 Mass mobilization is among the most dramatic and inspiring forces for political change When ordinary citizens take to the streets in large numbers they can undermine and even topple undemocratic governments as the recent wave of peaceful uprisings in several postcommunist states has shown However investigation into how protests are organized can sometimes reveal that the origins and purpose of people power are not as they appear on the surface In particular protest can be used as an instrument of elite actors to advance their own interests rather than those of the masses *Weapons of the Wealthy* focuses on the region of post Soviet Central Asia to investigate the causes of elite led protest In nondemocratic states economic and political opportunities can give rise to elites who are independent of the regime yet vulnerable to expropriation and harassment from above In conditions of political uncertainty elites have an incentive to cultivate support in local communities which elites can then wield as a weapon against a predatory regime Scott Radnitz builds on his in depth fieldwork and analysis of the spatial distribution of protests to demonstrate how Kyrgyzstan s post independence development laid the groundwork for elite led mobilization whereas Uzbekistan s did not Elites often have the wherewithal and the motivation to trigger protests as is borne out by Radnitz s more than one hundred interviews with those who participated in observed or avoided protests Even Kyrgyzstan s 2005 Tulip Revolution which brought about the first peaceful change of power in Central Asia since independence should be understood as a strategic action of elites rather than as an expression of the popular will This interpretation helps account for the undemocratic nature of the successor government and the 2010 uprising that toppled it It also serves as a warning for scholars to look critically at bottom up political change

Currents in the Interpretation of Paul Neil Elliott, 2024-09-05 The apostle Paul has long been championed or criticized as a Christian thinker as a brilliant theological genius or an enthusiastic convert who spun arguments to justify his new allegiances In these essays

Neil Elliott engages some of the most provocative currents in contemporary scholarship including Paul and the nature of violence the presumptions of religious cultural or national innocence in particular interpretations of the apostle the recent enthusiasm for Paul in some streams of Marxist thought competing construals of economic realities in Paul's day and our own and questions surrounding Paul's legacy today
