

# Tooth Extraction Process

1

Your dentist will begin with a thorough dental examination, which may include X-rays and a thorough medical history.

2

You must inform your dentist about any medical issues you have and any drugs you are taking prior to the procedure.

3

To treat any infection concerns, your dental specialist may prescribe antibiotics ahead of removing a tooth.

4

When you're ready, your dentist will administer an anesthetic to alleviate any pain.

5

Dentist uses special tools to rock and loosen the tooth, then pulls it out with forceps.

6

Tough teeth get chopped! Dentist breaks them into bits for easy removal.

7

Surgery can be necessary if there isn't enough tooth visible above the gum line or if more than one tooth needs to be extracted.
