Eapen,2010-03-20 Some Have Babies Others Regrets examines the relevance of the creation mandate for human beings to multiply and fill the earth in today s world It evaluates popular notions about the world being over populated in the light of available scientific evidence    *Catastrophic Thinking* David Sepkoski,2023-12-06 It seems self evident to most of us that diverse ecosystems and societies are intrinsically valuable but in fact the current fascination with diversity is a relatively recent phenomenon What is also clear from our current perspective is that the way we value diversity depends crucially on our sense that it is precarious that it is something actively threatened and that its loss could have profound consequences In other words fears about extinction permeate current discussions of biological and cultural diversity and so David Sepkoski argues if we better understand the history of extinction we can make better sense of our fears and anxieties about diversity loss This book shows why we simply cannot appreciate how and why diversity has become such a central value in our cultural landscape without understanding how extinction came to embody a sense of catastrophic threat    Poor's Manual of the Railroads of the United States ,1917 With an appendix containing a full analysis of the debts of the United States the several states municipalities etc also statements of street railway and traction companies industrial corporations etc    Future Survey Annual 1983 Michael Marien,1984-01-01    *On Human Conflict* Lou Marinoff,2019-02-13 *On Human Conflict* excavates the cavernous philosophical foundations of war and peace The magnum opus is bracketed by the author s experience of the Cuban missile crisis as a schoolboy and his witnessing of 9 11 as an adult It studies the human species with an admixture of evolutionary insight free ranging horror and heavily guarded optimism It is also the uncensored voice of a conservative philosopher who dares to speak his mind on contemporary conflicts including the culture and gender wars and Islamic jihad in an age when political correctness has lowered an Ivy Curtain prohibiting freedom of expression on campus and across Western civilization entire    **Environmental Ethics** Robert Elliot,1995 This latest addition to the acclaimed Oxford Readings in Philosophy series offers a selection of some of the best articles on ethics and the environment written in the last twenty years Focusing on the philosophical issues underlying this key topic the contributions cover duties to future people resource conservation species and wilderness preservation the relevance of ecology to ethics ecofeminism and the tension between political liberalism and environmentalism Including writings by Baird Callicot Colleen D Clements Mary Midgley John Passmore Holmes Rolston III Mark Sagoff Elliott Sober Mary B Williams Andrew Brennan Freya Matthews Val Plumwood and Richard Routley this accessible and timely book makes a perfect introduction to the main debates in this area    **American Constitutions** Franklin Benjamin Hough,1872    **Moody's Manual of Industrial and Miscellaneous Securities** ,1917    *Moody's Manual of Railroads and Corporation Securities*
