

**Nevesbu**  
Naval Architects  
Since 1935

## SUBMARINE DESIGN & ENGINEERING SINCE 1935

Nevesbu holds a unique position in submarine design & engineering. Since its establishment in 1935, Nevesbu continuously works on submarines for the Dutch navy and foreign navies. In addition to the upkeep programme for the Walrus class, Nevesbu currently works on the construction, upkeep and modification of submarines in four other countries worldwide.

Scan the QR-code to read more about Nevesbu's submarine services and experience.

**David R Yocum**

## **Submarine Design And Development:**

*Submarine Design and Development* Norman Friedman, 1984      [Changes to United States Navy Submarine Design and Construction During World War I, as Determined by The General Board](#) David R Yocum, 2024-01-30 The submarine came of age during World War I and navies around the world scrambled to adopt the powerful new technology This document provides a comprehensive overview of the changes to United States Navy submarine design and construction during World War I It discusses the discussions and considerations of the Board regarding various aspects of submarine design including size propulsion systems armament and habitability systems The document also highlights the efforts to improve submarine technology such as the use of listening devices gyrocompasses hydrophones and radio sets It emphasizes the impact of the General Board of the US Navy on submarine design and development particularly in response to Germany's unrestricted submarine warfare The document concludes that the Board's influence led to the development of more capable submarines laying the foundation for future advancements This annotated edition illustrates the capabilities of the AI Lab for Book Lovers to add context and ease of use to manuscripts It includes five types of abstracts building from simplest to more complex TLDR one word ELI5 TLDR vanilla Scientific Style and Action Items three essays to increase viewpoint diversity Grounds for Dissent Red Team Critique and MAGA Perspective and Notable Passages and Nutshell Summaries for each page

**Sustaining U.S. Nuclear Submarine Design Capabilities** John F. Schank, Mark V. Arena, Paul DeLuca, Jessie Riposo, Kimberly Curry Hall, Kimberly Curry, 2007-06-14 Nuclear submarine design resources at the shipyards their suppliers and the Navy may erode for lack of demand Analysis of alternative workforce and workload management options suggests that the U S Navy should stretch out the design of the next submarine class and start it early or sustain design resources above the current demand so that the next class may be designed on time on budget and with low risk      **U.S. Submarines Since 1945** Norman Friedman, 2018 In the tradition of his acclaimed warship design histories Norman Friedman describes the forces technical political and operational that shaped a vital element of U S sea power For example he examines the evolution in missions such as forward based antisubmarine warfare and strategic deterrence that transformed the submarine from its former subsidiary role to the center of national power *U S Submarines Since 1945* is also the story of a technological revolution first the emergence of fast diesel electric craft then the shock of nuclear power followed by the appearance of submarine launched ballistic missiles Nowhere else can a reader find so complete or sophisticated an account of the development of the U S submarine force including not only the hulls but also the weapons and sensors they carry The book details what submarines were ordered what weapons and propulsion systems they had how they performed and what sonars and combat systems were developed This illustrated design history contains more than 100 photographs and more than 100 line drawings including specially commissioned artwork from technical illustrator James L Christley These exclusive illustrations along with the incisive text capture the excitement of a revolutionary period in submarine development

Enthusiasts and professionals alike will welcome the abundance of information offered In this revised edition Norman Friedman explores what has happened since the Cold War which means both new classes and new technology some of it applied to existing submarines New material includes weapons and sensors as they have developed since 1995 This new technology is explained in the context of very different post Cold War priorities In addition Friedman includes new information that has become available on submarines described in the earlier edition
