shown that EI plays an important role in the prediction of behaviour besides personality and cognitive factors. However, it is not until quite recently that studies on EI have considered the importance of individual differences in EI and their interaction with cognitive abilities. The general issue of this Research Topic was to expose the role of individual differences on EI in the development of a large number of competencies that support a more efficient performance in people's everyday life. The present Research Topic provides an extensive review that may give light to the better understanding of how individual differences in EI affect human behaviour. We have considered studies that analyse 1 how EI contributes to emotional, cognitive and social processes beyond the well-known contribution of IQ and personality traits, as well as the brain system that supports the EI; 2 how EI contributes to relationships among emotions and health and well-being; 3 the roles of EI during early development and the evaluation in different populations; 4 how implicit beliefs about emotions and EI influence emotional abilities.

El test de matrices progresivas de Raven Florentino Rodao, 1982 *Intelligence Measurement and School Performance in Latin America* Carmen Flores-Mendoza, Rubén Ardila, Ricardo Rosas, María Emilia Lucio, Miguel Gallegos, Norma Reátegui Colareta, 2018-06-20. This book presents the results of the most complete and updated assessment of cognitive resources of students in Latin America: the Study of Latin American Intelligence (SLATINT). During four years, top researchers of the region used a standardized set of cognitive measures to assess 4,000 students aged between 14 and 15 years from six countries: Brazil, Argentina, Mexico, Chile, Colombia, and Peru. The data collected and now analyzed in this volume is a first step to understand the human cognitive capital of the region, a crucial resource for any country today. Intelligence research has shown that the cognitive skills of a population are strongly associated with the school performance of its students and the development of a nation. This makes *Intelligence Measurement and School Performance in Latin America* a valuable tool both for Latin American researchers and authorities engaged in the improvement of each country's human resources and for psychologists, educators, and other social scientists dedicated to the study of the impact of intelligence in the development of nations. Guide to Psychological Assessment with Hispanics Lorraine T.

Benuto, 2012-09-19. This book focuses on diversity, culture, and ethnicity as they relate to psychological assessment of Hispanics. It is a how-to guide for clinicians, researchers, and instructors working with Hispanic clients. Each chapter contains an overview of cultural considerations needed for assessing the Hispanic client, followed by a specific exploration of the assessment measures available and the research that has been conducted on these measures with Hispanic participants. An exploration of the strengths and limitations of each assessment measure is included. Considering that ethnocultural minority individuals who are of Hispanic/Latino origin make up the largest ethnocultural minority group in the United States, guidelines for working with this population are a must. Given that a large subset of this percentage is composed of immigrants, many of whom do not speak English or who have learned English as a second language, special considerations for effective psychological assessment are necessary. This book fills a gap in the scientific literature by consolidating the

research on psychological assessment with Hispanic samples into one comprehensive volume and providing simple recommendations for the psychological assessment of Hispanic clients An exploration of the general psychological assessment domains e g personality intelligence is included with references to research on the major assessment measures used in the field A more specific exploration of psychodiagnostic assessment measures follows including the assessment of mood disorders anxiety disorders sexual dysfunction psychosis etc Several chapters are dedicated to specialized assessment including neuropsychological assessment forensic assessment and school based assessment overall creating the most comprehensive up to date research based compendium of psychological assessment measures for use with Hispanic clients
