Lewis, David G. Rethwisch, 1993 Hardbound There has been a scarcity of authoritative published information on the direct reactions of silicon Nevertheless the need for up to date information on the reactions and their silane products persists across a broad range of scientists Recent progress warrants documentation of the state of the art and identification of the areas for future research Some of the highlights of this book are An authoritative presentation of the state of commercial practice on the direct synthesis of chlorosilanes and

methylchlorosilanes in more depth and breadth than can be found elsewhere in a single volume The use of in line FTIR for real time analysis of methylchlorosilane vapors exiting the direct reaction shortens the analysis time from 30 minutes to 20 seconds and provides information comparable to gas chromatography Thorough discussions of the role of promoters surface enrichment surface composition and structure and s
