Intelligent Industrial Internet Systems Wanchun Dou,Xiaolong Xu,Shui Yu,2023-11-20 In the process of transforming modern manufacturing into intelligent manufacturing more and more manufacturing processes are being deployed digitally on the Internet As a novel digital industrial infrastructure and new application ecology Industrial Internet could integrate the novel information and communication technology into various industrial manufacturing processes through the safe and reliable intelligent interconnection of factors concerning people machines and things It aims at significantly improving the digitalization networking and intelligence of manufacturing processes through the comprehensive interconnection of all manufacturing factors To deploy and run traditional manufacturing processes on Industrial Internet efficiently corresponding digital technical means are called for These technical means play an important role in many potential applications of intelligent manufacturing e g integrating product lifecycle data strengthening industrial chain cooperation providing decision making service information oriented on the production organization process and providing data support for product optimization and upgrading This book focuses on the theory techniques and means for integrating intelligent Industrial Internet applications deployed via mobile edge computing Concretely it mainly studies the intelligent theory techniques and means from a problem driven and demand driven perspective which supports collaborative design agile manufacturing remote operation and maintenance on Industrial Internet These technologies primarily include Industrial Internet centric intelligent resource scheduling methods various types of industrial data privacy protection intelligent version management technologies supporting digital twin applications various data mining algorithms for intelligent execution of business processes etc Given its scope the book offers a valuable theoretical and technical resource for project managers technical developers researchers educators and students at colleges and universities

The Real Internet Architecture Pamela Zave,Jennifer Rexford,2024-06-25 A new way to understand the architecture of today s Internet based on an innovative general model of network architecture that is rigorous realistic and modular This book meets the long standing need for an explanation of how the Internet s architecture has evolved since its creation to support an ever broader range of the world s communication needs The authors introduce a new model of network architecture that exploits a powerful form of modularity to provide lucid insightful descriptions of complex structures functions and behaviors in today s Internet Countering the idea that the Internet s architecture is ossified or rigid this model which is presented through hundreds of examples rather than mathematical notation encompasses the Internet s original or classic architecture its current architecture and its possible future architectures For practitioners the book offers a precise and realistic approach to comparing design alternatives and guiding the ongoing evolution of their applications technologies and security practices For educators and students the book presents patterns that recur in many variations and in many places in the Internet ecosystem Each pattern tells a compelling story with a common problem to be solved and a range of solutions for solving it For researchers the book suggests many

directions for future research that exploit modularity to simplify optimize and verify network implementations without loss of functionality or flexibility
