## Strange Bird:

*The Strange Bird* Olajire Olanlokun, 2006      *Strange Birds at the Zoo* Mrs. Julia (Ten Eyck) Stoddart, 1929      **State Service** James Malcolm, 1917      Surreal Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction. In contrast to universalist and essentializing ways of responding to new material realities, VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today: the ecological, technological, aesthetic, epistemological, and political challenges of life in the Anthropocene era. Situating these messy, multi-scalar material complexities of life in close relation to their ecological, material, and colonialist histories, his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight. The collection measures VanderMeer's work as a new kind of speculative surrealism, his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies. The first collection to survey academic engagements with VanderMeer, this book brings together scholars in the fields of environmental literature, science fiction, genre studies, American literary history, philosophy of technology, and digital cultures to reflect on the environmentally, culturally, aesthetically, and politically central questions his fiction poses to predominant understandings of the Anthropocene.      **Science and Affect in Contemporary Literature** Shannon Lambert, 2024-12-12 Moving from the micro world of quantum physics to the macro scales of earth science and ecology, this book considers how in contemporary literature affective experiences like desire, suffering, anxiety, and joy shape scientific persons, practices, and products. This book brings into dialogue close readings of scientific writing and contemporary literary works by authors like Jeanette Winterson, Richard Powers, Hanya Yanagihara, Thalia Field, and Jenny Offill. Combining narrative and affect studies, it uses formal strategies such as moving metaphor, visceral or affective description, plot level analogy, contraction, and rhythm to engage with western scientific epistemologies which still tends towards the impassive, universal, and objective. While each chapter focuses on a different field or fields of science, all foreground bodies, human and nonhuman, as a way of exploring knowledge production. Through close readings, the book argues that select scientific stories raise important questions about how knowledge is defined and who and what is invited into its processes of production.      **Composition Standards** Jerohn Joseph Savitz, Myrtle Garrison Bates, D. Ralph Starry, 1923      Bird-lore, 1924 Bulletin, 1913      Really Strange Birds Janey Levy, 2016-12-15 Feathers, beaks, and wings are unique to birds, but sometimes these features can be really strange. This title takes a look at the world's oddest birds, including birds of paradise, frigate birds, pelicans, vampire finches, the great grey shrike, and more. Readers will delight in learning about birds and their weird adaptations and will also understand how the adaptations have played a role in their survival. This high-interest title explores important science concepts such as habitats, behavior, life cycles, and more. Colorful photographs and sidebars allow
