An Internet for the People Jessa Lingel, 2022-06-14 How craigslist champions openness democracy and other vanishing principles of the early web Begun by Craig Newmark as an e mail to some friends about cool events happening around San Francisco craigslist is now the leading classifieds service on the planet It is also a throwback to the early internet The website has barely seen an upgrade since it launched in 1996 There are no banner ads The company doesn't profit off your data An Internet for the People explores how people use craigslist to buy and sell find work and find love and reveals why craigslist is becoming a lonely outpost in an increasingly corporatized web Drawing on interviews with craigslist insiders and ordinary users Jessa Lingel looks at the site s history and values showing how it has mostly stayed the same while the web around it has become more commercial and far less open She examines craigslist s legal history describing the company s courtroom battles over issues of freedom of expression and data privacy and explains the importance of locality in the social relationships fostered by the site More than an online garage sale job board or dating site craigslist holds vital lessons for the rest of the web It is a website that values user privacy over profits ease of use over slick design and an ethos of the early web that might just hold the key to a more open transparent and democratic internet

advice But they agree on one thing in today's economy you can't just be an employee looking to get hired you have to market yourself as a business one that can help another business achieve its goals That's a radical transformation in how we think about work and employment says Ilana Gershon And with *Down and Out in the New Economy* she digs deep into that change and what it means not just for job seekers but for businesses and our very culture In telling her story Gershon covers all parts of the employment spectrum she interviews hiring managers about how they assess candidates attends personal branding seminars talks with managers at companies around the United States to suss out regional differences like how Silicon Valley firms look askance at the lengthier employment tenures of applicants from the Midwest And she finds that not everything has changed though the technological trappings may be glitzier in a lot of cases who you know remains more important than what you know *Rich in the voices of people deeply involved with all parts of the employment process Down and Out in the New Economy* offers a snapshot of the quest for work today and a pointed analysis of its larger meaning
