Learning in Social Context: The Nature and Profit of Living in Groups for Development Ildikó Király, David Buttelmann, 2017-05-25 One of the distinctive features of humans is their unique sociality Humans live in organized societies that are characterized by a high level of interdependence of group members in various aspects of life ranging from the economic phenomenon of labour division to providing emotional support to others Under these circumstances the capacity to track social connections within and between groups has great adaptive value in managing everyday life We may understand the importance and adaptive value of tracking the scope of culturally shared knowledge if we consider the importance of cultural norms in guiding behaviour To become a competent member of their cultural group one must be able to conform to the group's specific behavioural norms and to accumulate culturally shared knowledge Acquiring this knowledge is essential for successful social interactions In contrast to current dominant explanatory theories emphasizing that social category formation is simply rooted in humans need to belong and affiliate with a group the aim of this e book is to provide evidence that in addition to its affiliative role children form social categories for epistemic purposes We show that children use specific cues like kinship patterns of resource allocation and consensus to understand group cohesion Section 1 Once children figured out who is in group and who is out group they show a significant in group bias in attention acting and learning Section 2 Yet this in group bias can be attenuated by induced synchronous behavior Section 3

Wingless Chickens, Bayou Catholics, and Pilgrim Wayfarers L. Lamar Nisly, 2011 Flannery O'Connor Tim Gautreaux and Walker Percy are all Catholic writers from the South and seem to embody very fully both parts of that label Yet as quickly becomes clear in their writing their fiction employs markedly different tones and modes of addressing their audience O'Connor seems intent on shocking her reader whom she anticipates will be hostile to her deepest beliefs Gautreaux gently and humorously engages his reader inviting his expected sympathetic audience to embrace the characters needed moral growth Percy satirically lampoons an array of social ills and failings in the Church as he tries to get his audience laughing with him while he makes his deadly serious point about the flaws he finds in the church and larger culture Why do these three writers assume such divergent images of their audience Why do texts by three writers who each embrace their Southern locale and their Catholic beliefs seem to have so little in common To answer these questions Nisly helps readers understand these authors' fiction by examining the role that place and time had in shaping each author's idea of an audience and by extension his or her manner of addressing that audience More specifically Nisly focuses on each author's experience of Catholic community and each author's placement in relation to the Second Vatican Council Linking together biographical information and a reading of their fiction Nisly argues that O'Connor's Gautreaux's and Percy's sense of audience has been shaped in significant ways by each author's own local experience of Catholicism in his or her home region as well as the larger global changes of Vatican II that transformed Roman Catholicism **Ants, Bees, and Wasps** Sir John Lubbock, 1888
