Bootstrapping Trust in Modern Computers Bryan Parno,Jonathan M. McCune,Adrian Perrig,2011-08-27 Trusting a computer for a security sensitive task such as checking email or banking online requires the user to know something about the computer s state We examine research on securely capturing a computer s state and consider the utility of this information both for improving security on the local computer e g to convince the user that her computer is not infected with malware and for communicating a remote computer s state e g to enable the user to check that a web server will adequately protect her data Although the recent Trusted Computing initiative has drawn both positive and negative attention to this area we consider the older and broader topic of bootstrapping trust in a computer We cover issues ranging from the wide collection of secure hardware that can serve as a foundation for trust to the usability issues that arise when trying to convey computer state information to humans This approach unifies disparate research efforts and highlights opportunities for additional work that can guide real world improvements in computer security

A Trusted Cloud Computing With Cryptographic Technique Raja Praveen.k.n,2013-10-02 Document

from the year 2013 in the subject Computer Science Internet New Technologies grade A language English abstract This book focuses on the security issues in Cloud Computing System Cloud Computing is an upcoming paradigm that offers tremendous advantages in economical aspects such as reduced time to market flexible computing capabilities and limitless computing power To use the full potential of the cloud computing data is transferred processed and stored by external cloud providers However data owners are very skeptical to place their data outside their own control sphere This book discusses the security controls to protect data in cloud computing environment using Cryptographic technique Cloud computing provide the way to share distributed resources and services that belong to different organizations Since cloud computing share distributed resources via the network in the open environment thus it makes security problems important for us to develop the cloud computing application In this book we pay attention to the security requirements in cloud computing environment We proposed a method to build a trusted computing environment using cryptographic technique for cloud computing system by integrating the trusted computing platform into cloud computing system Security has become a major concern in cloud computing environment Where the resources are shared by many Users join and leave the cloud dynamically which leads to a serious challenge for the security of shared resources Hence there s a need to establish trust in the cloud so that the users are ensured of their data security We propose a model system in which cloud computing system is combined with trusted computing platform with trusted platform module In this model some important security services including authentication confidentiality data Storage data security and access control are provided in cloud computing system

Annual ACM Symposium on Principles of Distributed Computing ,2003** **Proceedings of the Twenty-Second Annual ACM Symposium on Principles of Distributed Computing ,2003** This paper presents an efficient asynchronous protocol to compute RSA inverses with respect to a public RSA modulus N whose factorization is secret and shared among a group of parties Given two numbers x and e the protocol computes y such that $ye \equiv x \pmod{N}$ A synchronous protocol for this task has been presented by Catalano Gennaro and Halevi Eurocrypt 2000 but the standard approach for turning this into an asynchronous protocol would require a Byzantine agreement sub protocol Our protocol adopts their approach but exploits a feature of the problem in order to avoid the use of a Byzantine agreement primitive Hence it leads to efficient asynchronous protocols for threshold signatures and for Byzantine agreement based on the strong RSA assumption without the use of random oracles
