Uncertainty

- Most intelligent systems have some degree of uncertainty associated with them.

- The types of uncertainty that can occur in KBS may be caused by problems with the data.

1. Data might be missing or unavailable.
2. Data might be present but unreliable or ambiguous due to measurement errors, multiple conflicting measurements etc.
3. The representation of the data may be imprecise or inconsistent.
4. Data may just be user's best guess.
5. Data may be based on defaults and the defaults may have exceptions.

Intelligent Systems for Engineering Ram D. Sriram,2012-12-06 When men of knowledge impart this knowledge I do not mean they will convince your reason I mean they will awaken in you the faith that it is so Sri Krishna Bhagavadgita BACKGROUND The use of computers has led to significant productivity increases in the en gineering industry Most ofthe computer aided engineering applications were restricted to algorithmic computations such as finite element programs and circuit analysis programs However a number ofproblems encountered in en gineering are not amenable to purely algorithmic solutions These problems are often ill structured the term ill structured problems is used here to de note problems that do not have a clearly defined algorithmic solution An experienced engineer deals with these ill structured problems using his her judgment and experience The knowledge based systems KBS technology which emerged out of research in artificial intelligence AI offers a method ologyto solve these ill structuredengineering problems The emergenceofthe KBS technology can be viewed as the knowledge revolution other important events that led to increased productivity are the industrial revolution 17th century the invention of the transistor and associated developments first half of the 20th century and the world wide web towards the end of the 20th century Kurzweil in a lecture at M LT on December 3 1987 linked the progress of automation to two industrial revolutions the first industrial PREFACE xxxii revolution leveraged our physical capabilities whereas the second industrial revolution the knowledge revolution is expected leverage oUr mental ca pabilities
